Custer County History (Custer, County Seat)

As gold was discovered in the Black Hills, Custer County was established. Founded in 1877, Custer County was named after General George A. Custer. The county seat was originally chosen as Hayward, but due to an undecided election, Custer City was able to successfully battle for the county seat. Residents of Custer City devised a plan of staging a massacre to distract Hayward officials and the county seat was secured. As the Burlington Railroad arrived in 1890, Custer County continued to grow until the gold rush ended. Industry began to include agriculture, mining, ranching and tourism. Today Custer County is home to approximately 7,924 residents.

Custer County Communities

BUFFALO GAP

Buffalo Gap, founded in 1877, was named due to buffalo traveling through the gap of the nearby Beaver Creek. A post office was established and by 1884 there were over 1200 people in residence. As the railroad arrived in 1885, the area continued to grow and had a variety of saloons, hotels, specialty shops and a bank. A boomtown and cattle town, Buffalo Gap has since grown to a small rural community. Today Buffalo Gap is home to approximately 154 residents.

CUSTER (COUNTY SEAT)

General George A. Custer commanded an expedition to the area in search of gold in 1874. As gold was discovered, a community was quickly founded and Custer was originally known as Stonewall. By 1875 there were several thousand people panning for gold and Stonewall was renamed Custer. Within a year, news spread of gold found in Deadwood Gulch and Custer was left almost abandoned. In 1877 Custer was selected as the county seat and the area grew slowly. The Harney National Forest Headquarters were established in 1898 and Custer State Park was then founded in 1913. Today Custer is home to approximately 1,980 residents.

Lawrence County History (Deadwood, County Seat)

Lawrence County was organized in 1877 and named in honor of its first county treasurer, Colonel John Lawrence. Although Lawrence County was one of the smallest counties in South Dakota, it included half the population and wealth of the Black Hills, estimated at 18,000 people and 11 million dollars in 1903. Settlers arrived in search of gold and communities were established near stage coach stops and rail lines. With the gold rush, Lawrence County was booming. As the gold rush ended, development slowed. Deadwood was voted as the county seat and was home to several historical figures including Wild Bill Hickok and Calamity Jane. At one point, Deadwood was the largest city in South Dakota. Today Lawrence County is home to approximately 23,498 residents.

Lawrence County Communities

DEADWOOD (COUNTY SEAT)

Once an illegal community, Deadwood was incorporated in 1876 and named after dead trees found in the nearby canyon. Gambling, prostitution and gold mining attracted settlers and by 1880 its population reached 5,000. Deadwood became famous for the murder of Wild Bill Hickok and the community was widely recognized for its lawless character. As the gold rush ended, Deadwood was almost destroyed by fire. The railroad arrived in 1881 and Deadwood continued to prosper, having the first telephone service in South Dakota. It was the trading center for the Black Hills and selected as the county seat. Today Deadwood is home to approximately 1,272 residents.

LEAD

In 1876 the Homestake Mining Company founded Lead as a company town. As families grew, the need for education grew. Phoebe Hearst, local resident, established a kindergarten school and a library in 1900. As the gold rush slowed, Lead's population began to decline. With over four hundred historic buildings, much of Lead was registered on the National Register of Historic Places in 1974. Today Lead is home to approximately 2,848 residents.

SPEARFISH

The name Spearfish was coined by local Native Americans and fur traders and trappers as the local stream was a prime place for spearing fish. The community was platted in 1876 and a post office and general store were established a year later. The Spearfish Normal School was built in 1883, which is now recognized as Black Hills State University. As the railroad arrived in 1893, Spearfish continued to grow. The D.C. Booth Fish Hatchery and Matthew's Opera House are located here, attracting visitors annually. Today Spearfish is home to approximately 9,979 residents.

WHITWOOD

Whitewood was established in 1888 and as the railroad arrived, the area began to thrive. The railroad station became the heart of the community and Whitewood was known as the Hub of the Hills. As the gold rush ended, development began to slow. Today Whitewood is home to approximately 856 residents.

Meade County History (Sturgis, County Seat)

Meade County, the largest county in South Dakota, was named in honor of General George Meade whom Fort Meade is named for. It was established in 1878 and settled by prospectors in search of gold and soldiers stationed at Fort Meade. Communities grew quickly near stage coach stops and from 1900 to 1910, the population of Meade County grew from almost 5,000 to over 12,000. Industry began to include agriculture, ranching and tourism. Today Meade County is home to approximately 23,916 residents.

Meade County Communities

BOX ELDER

Settled in a fertile valley, Box Elder was founded as the railroad arrived in 1907. It was named after the local box elder trees and the community began to grow. A post office, school and general stores were established, attracting many settlers. It is the site of the Ellsworth Airforce Base and the Air and Space Museum. Today Box Elder is home to approximately 4,271 residents.

ELLSWORTH AIRFORCE BASE

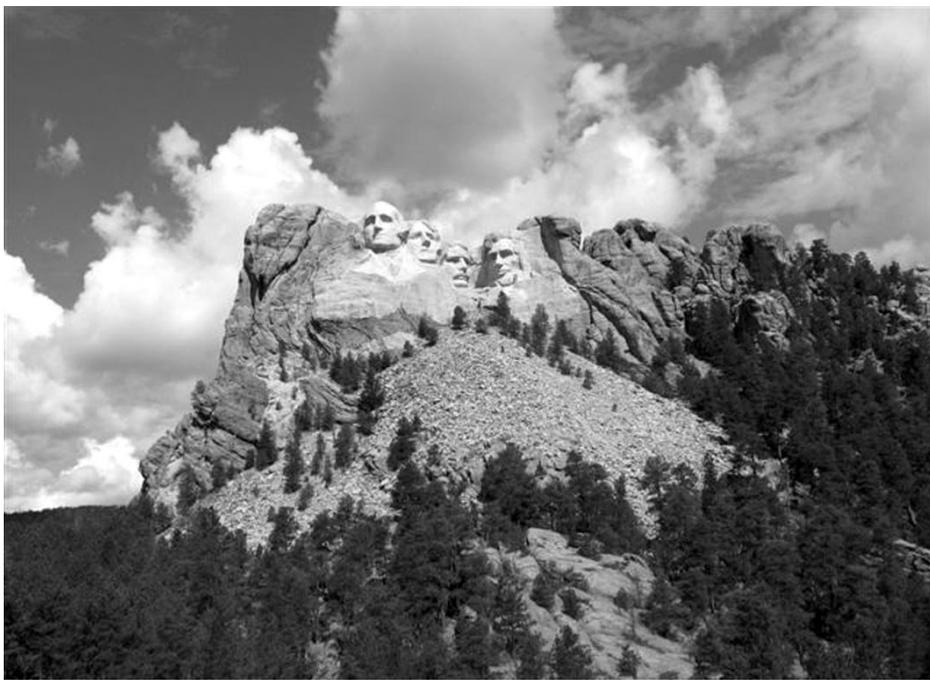

The Ellsworth Airforce Base was established in 1942 to train military pilots for World War II. It was first known as the Rapid City Army Air Base until it was renamed in honor of Brigadier General Richard E. Ellsworth. It now houses the 28th Bomb Wing of the Air Combat Command and is NASA Space Shuttle's emergency landing site. Today the Ellsworth Airforce Base is home to approximately 4,165 residents.

PIEDMONT

As the railroad arrived in the late 1800s, Piedmont was established. Its name is French for foot of the mountain, as it lies near the base of the Black Hills. The community attracted miners, lumberers and pioneers and has since continued to grow. Piedmont was officially incorporated in 2008. Today Piedmont is home to approximately 2,820 residents.

STURGIS (COUNTY SEAT)

Fort Meade was established in 1878 to defend settlers and gold miners of the Black Hills area and Sturgis grew as a boomtown. Sturgis became a stagecoach and freight stop and the community was named in honor of Colonel Samuel D. Sturgis, Fort Meade commander. Sturgis was incorporated in 1888 and later selected as the county seat. As the gold rush ended, development slowed until 1938 when Pappy Hoel and Jack Pine Gypsies started the annual Sturgis Motorcycle Rally. The rally, first called the Black Hills Classic, featured racing and stunts and now draws over 500,000 attendants annually, giving Sturgis the nickname Motorcycle City USA. Sturgis is also the site of Bear Butte, sacred grounds which have been established as a state park. Today Sturgis is home to approximately 5,981 residents.

Pennington County History (Rapid City, County Seat)

Pennington County was organized in 1875 and was named in honor of Dakota Territory Governor John L. Pennington. The original county seat was located in Sheridan until it was moved to Rapid City. With the arrival of the Gold Rush, prospectors and miners flocked to the area. Mining camps became cities and by 1910, the population of Pennington County reached 12,453. As the gold rush came to a halt, tourism replaced industry. In 1941 Mount Rushmore was completed by Gutzon Borglum and dedicated by President Calvin Coolidge, now attracting over 3 million visitors annually. Today Pennington County is home to approximately 100,850 residents.

Pennington County Communities

HILL CITY

Hill City, the oldest city in Pennington County, grew as a mining town in the 1800s. First settled in 1876, Hill City was originally known as Hillyo. A post office was established in 1877 and as the gold rush ended, Hill City was left almost deserted. With the discovery of tin in 1883, Hill City was once again booming. A school was built in 1921 and the area grew as a popular tourist destination with the establishment of Custer State Park and Mount Rushmore. Today Hill City is home to approximately 927 residents.

KEYSTONE

Gold was found in the Keystone area and was first settled by Fred J. Cross in 1877. Originally known as Crossville, Keystone was platted by Jacob Reed and the community was renamed. Keystone grew as a boomtown and with the arrival of the railroad in 1900, its population reached 2,000. As Mount Rushmore was constructed, Keystone housed a majority of the workers and development continued. Today Keystone is home to approximately 327 residents.

RAPID CITY (COUNTY SEAT)

Rapid City was established in 1876 and platted by John Brennen and Samuel Scott. It was named after nearby Rapid Creek and promoted as the Gateway to the Black Hills. As a source for mining supplies, Rapid City grew to become a trading center. With the arrival of the railroad, Rapid City became an important transportation hub. It was selected as the county seat and is now a popular tourist destination. Today Rapid City is home to approximately 67,107 residents.

WALL

Wall, named for its proximity to the the high wall of the Badlands, grew as a small community in the late 1800s. With the establishment of the Wall Drug Store in 1931, Wall has grown to a well known tourist destination attracting nearly 12,000 visitors each day. Today Wall is home to approximately 821 residents.

Hunting Safety

All hunters should consider taking an advanced hunter education class to learn the latest hunting techniques along with tips on coming home alive.

Here are five suggestions for a safe and successful hunting experience:

1. Get a detailed map of the area you are hunting, review it before you leave, and carry it with you in the field.
2. Carry a compass and know how to use it. Decide ahead of time the direction to head for if you get lost or disoriented.
3. Weather can change quickly in Minnesota, so hunters should carry a simple survival kit and be prepared for an unexpected overnight stay in the field. The survival kit should contain a rope, a knife, water, waterproof matches, an emergency shelter, and first aid supplies.
4. If you are on the water, make sure to wear a personal flotation device (life preserver).
5. Know your hunting partners' physical and emotional limitations, as well as your own, and don't push your partners or yourself beyond those limits.

Boating Safety

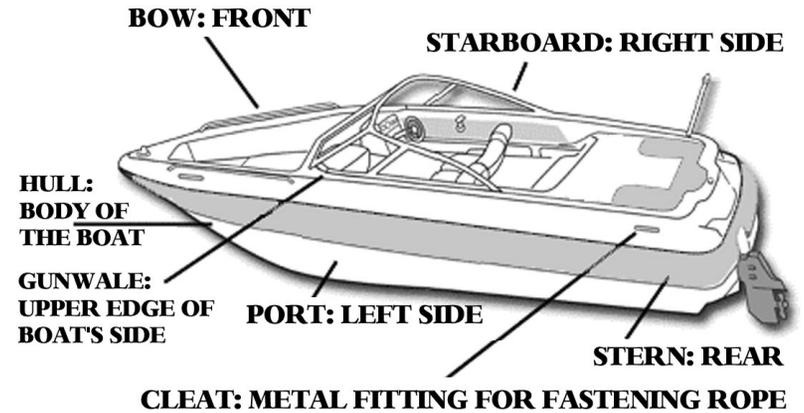

Operating Watercraft

Follow these guidelines to help prevent and prepare for capsizing, swamping, or someone falling overboard.

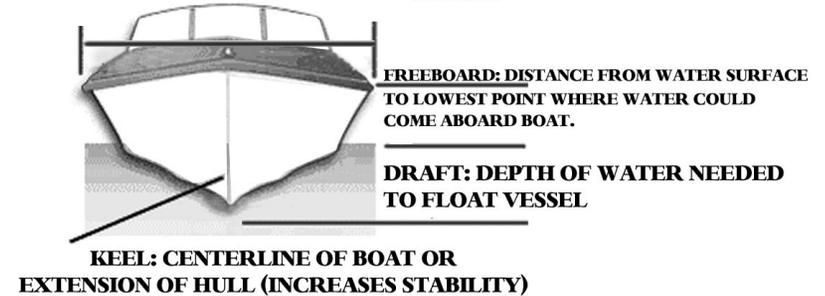

- Make sure that you and your passengers are wearing life jackets while the boat is moving.
- Attach the ignition safety lanyard to your wrist, clothes, or life jacket.
- Don't allow anyone to sit on the gunwale, bow, seat backs, motor cover, or areas not designed for seating. Also, don't let anyone sit on pedestal seats when craft is not in idle.
- Don't overload your boat. Balance the load of passengers and gear stored on-board.
- Keep your center of gravity low by not allowing people to stand up or move around while craft is in motion.
- In small boats, don't allow anyone to lean beyond the gunwale.
- Turn boat at slow rates of speed.
- Secure the anchor line to the bow, never to the stern.
- Don't risk operating water craft in rough conditions or bad weather.

Boating Safety

Know Your Craft

BEAM: MAXIMUM WIDTH OF BOAT

Who May Operate a Motorboat (Other Than a Personal Watercraft)

For engines 25 horsepower or less:

Those under age 12 may operate without restrictions.

For engines over 25 horsepower through 75 horsepower:

Those under age 12 must have someone 21 years of age or older on board within reach of the controls.

For engines over 75 horsepower:

No children under age 12 may operate, even with an adult on board.

Other restrictions apply to boat operators 12 to 17 years old:

Operators from 12 to 17 years of age may operate engines of 25 horsepower or lower with no restrictions.

For engines over 25 horsepower:

Operators 12 to 17 years of age must have:

A watercraft operator's permit, or someone age 21 years or older on board within reach of the controls.

ATV Safety

- Read the owner's manual and know your vehicle thoroughly.
- Check your vehicle before you ride.
- Wear protective equipment and clothing.
- Don't lend your vehicle to unskilled riders.
- Supervise young or inexperienced riders.
- Never carry a passenger on vehicles meant for one rider.
- Do not operate under the influence of drugs or alcohol.
- Drive at speeds that are appropriate to trail conditions.
- Stay to the right on trails.
- Stay away from thin ice, open water and wetlands
- Know the weather forecast.
- Make sure headlights and taillights work properly.
- Maintain safe distances between other riders.
- Reduce your speed when riding at night.
- Yield to other motor vehicles and trail users.
- Young or beginning riders are encouraged to take a safety training course.

OPEN 8 - 5:30 Monday through Saturday

Bicycle Safety

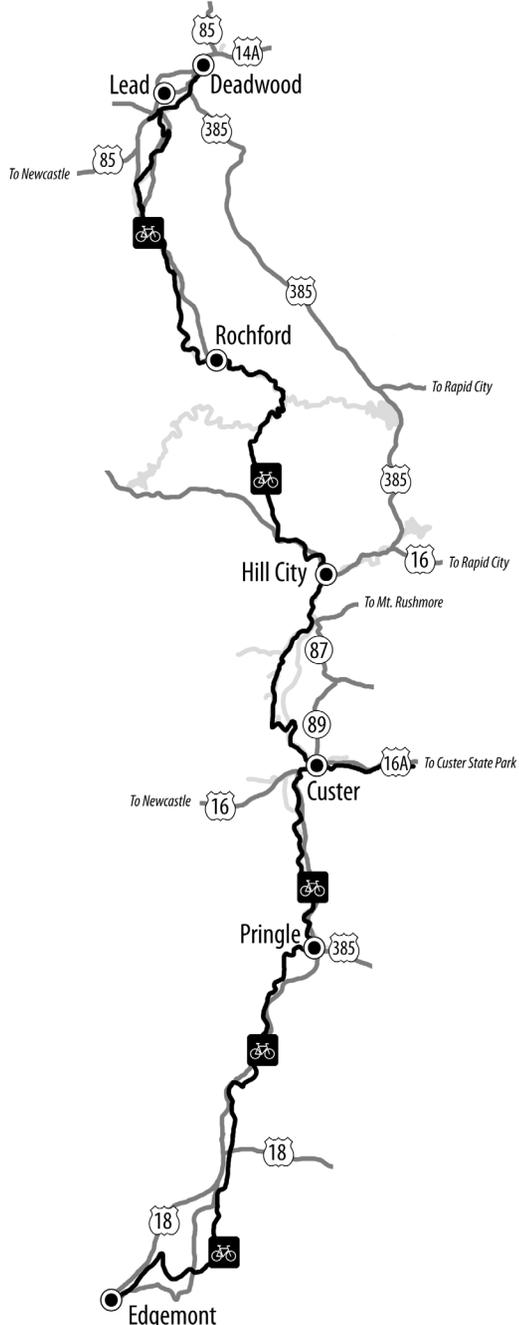

- Always wear a properly fitting bike helmet as most serious injuries are to the head.
- Be sure your handlebars, seat and wheels fit snugly.
- Keep your bike in good shape by checking and oiling your chain, making sure your brakes work properly and maintaining your tire pressure.
- Always ride with both hands on the handlebars except when doing turn signals.
- When leaving a driveway, curb or alleyway always stop and check for traffic in both directions.
- Cross only at intersections.
- Use the crosswalk to walk your bike across busy intersections and follow the traffic signals.
- Never ride against traffic. Travel in the same direction as the cars.
- Whenever you can, use bike routes and avoid busy streets.
- Don't ride near parked cars as doors can open and cause accidents.
- Obey all traffic signs and traffic lights.
- When biking with friends, ride in a single file.
- Always pass other bikers or pedestrians on the left and say "On your left!" to make your presence known.
- Always use bicycle hand signals to alert traffic of your changing direction.

Bear Butte Bicycle Trails

George S. Mickelson Bicycle Trails

Snowmobile Safety

- Do not consume alcohol or take drugs prior to or during your snowmobile trip. Doing so increases your chances of injury or death.
- Slow down and don't cut to the inside of the trail corners. It's dangerous and illegal.
- If you snowmobile at night, don't override your lights.
- Always use the buddy system. Never ride off alone.
- Drowning is one of the causes of many snowmobile fatalities. Whenever possible, avoid the ice.
- Wear sensible, protective clothing designed for operating a snowmobile.
- Use a full size helmet, goggles, or visor to prevent injuries from twigs, stones, ice chips and other debris.
- Avoid wearing long scarves. They may get caught in moving parts of the snowmobile.
- Know the terrain you are going to ride. If unfamiliar to you, ask someone who has traveled over it before.
- Know the weather forecast, especially the ice and snow conditions.
- Be sure your snowmobile is in top-notch mechanical condition throughout the months of use.
- Familiarize yourself with the snowmobile you are driving. Thoroughly read the manual that accompanies the snowmobile.
- Do not pursue domestic or wild animals. That is not the conduct of a sportsman. Report such violations to the nearest law enforcement officer.

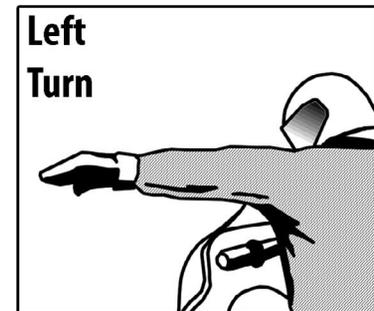

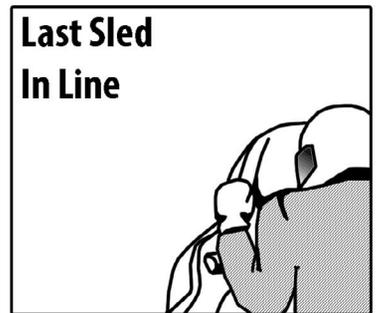

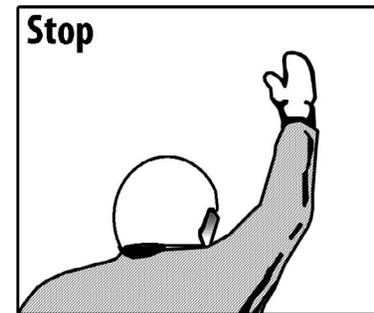

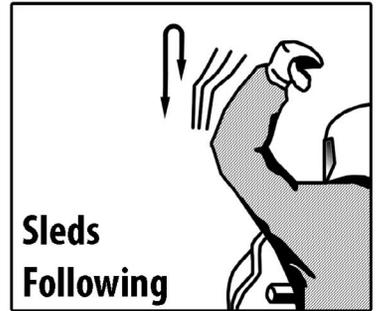

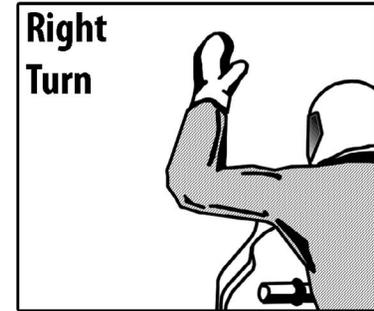

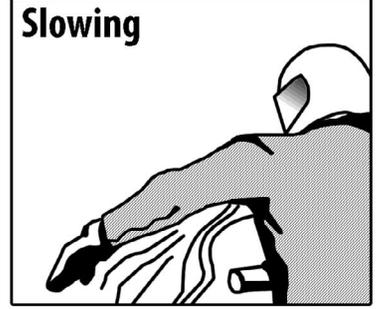

Common Trail Signs

Snowmobile Safety

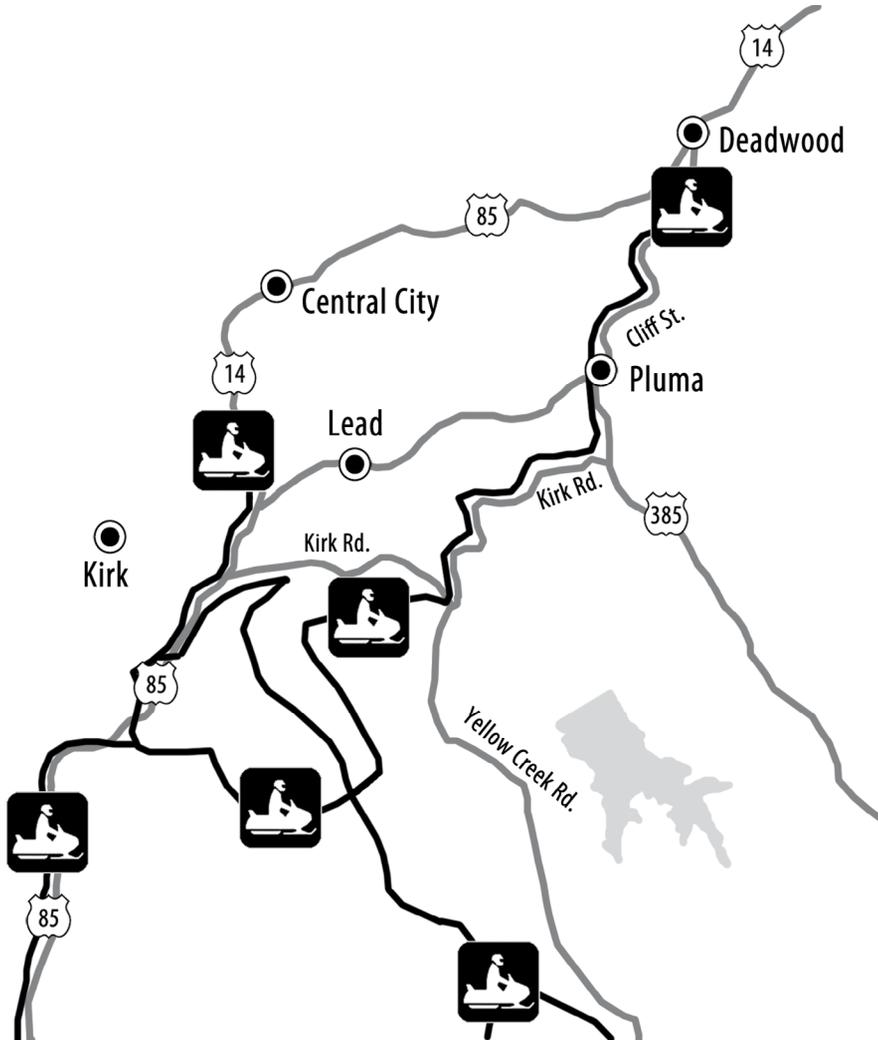

Communication is an essential part of safe riding. Hand signals are a practical way to communicate between other riders and traffic.

Be sure to give easy to see and clear hand signals when snowmobiling. Hand signals should never be subtle, but always deliberate.

SINCE 1984

651.646.4683

Home Safety

- Keep the outside of your home well-lit. Motion sensors and timers help deter burglars.
- Dead-bolts and peep-holes should be placed on all outside doors.
- Windows and sliding glass doors should have locks and be in good working order.
- Keep your garage door closed.
- Use an engraver to mark computers, cameras, stereos, TV's, tools, yard equipment, etc.
- Never leave valuables, expensive jewelry, or large amounts of cash at home. If you must, keep a list of your valuables with serial numbers to assist in insurance claims.
- Keep your car locked at all times and store all valuables out of sight.
- Guns should always be stored unloaded and with a gunlock.
- Become part of a neighborhood watch or program that is similar.
- Be suspicious of unusual people or vehicles in your neighborhood. Document the date, time, description and license plate number to give to law enforcement if needed.
- When on vacation, do not advertise your absence. Stop mail and newspaper delivery. Have a trusted friend or neighbor to give the impression you are home by stopping by to take out trash, shovel snow, mow the lawn, etc.

Carbon Monoxide Safety

PREVENTION

- Install carbon monoxide detectors near every bedroom, gas appliance and in your RV, camper or motor home and test them monthly.
- Have flues, chimneys and all fuel-burning appliances inspected by a professional annually.
- Make sure fireplaces, wood stoves, dryers, furnaces and water heaters are properly vented to the outside.
- Only burn clean and untreated wood.
- Never idle your car or gas powered vehicle in the garage, with or without the garage door open.
- Toxic fumes build up quickly and can easily contaminate your home.
- Never use gas-powered engines like weed trimmers, snow blowers, chain saws, lawnmowers or portable generators in enclosed areas.
- Never use a charcoal grill indoors or in any closed area.
- Never use a gas oven to heat your home.
- Never sleep in a room or area heated with a gas or kerosene space heater that does not have proper ventilation.

SYMPTOMS

- Headaches, severe fatigue, vomiting, nausea, muscle and joint pain, dizziness, tingling, vertigo
- Attention and multi-tasking problems, short-term memory problems, word-finding problems
- Irritability, temper, loss of interest, sleep disturbance, anxiety, lack of motivation
- Eating and swallowing difficulties, vision problems, lack of muscular coordination, speaking difficulty, ringing in the ears
- Seizures, tremors, balancing problems, shortness of breath

Carbon monoxide poisoning is easily confused with flu-like symptoms. Serious long-term health risks or death can result if warning signs are ignored. Carbon monoxide can affect you for days, weeks, months or years. High levels of carbon monoxide can be fatal within minutes.

TREATMENT

- Immediately take the victim out to fresh air.
- If the victim cannot be removed, open every window and door.
- All appliances should be turned off.
- Take the victim to an emergency room as quickly as fast as possible, or call 911.

Emergency Planning

ESCAPE ROUTES

Everyone in your family should know the best ways to exit the house in case of a disaster. Teach your young children how to open sliding doors, windows and other exits. Designate a meeting place where the family can gather after escaping from the house.

FLASHLIGHTS

The whole family needs to know where to find flashlights. Periodically check the batteries.

FULLY CHARGED CELL PHONES

All family members should keep their cell phones charged. Make a habit of charging them, while everyone is asleep. Cell phones can be lifesavers in emergencies.

LIST OF VALUABLES

Keep this document listing your possessions (and if possible, a video of your home interior) in a fireproof safe, or in a safe deposit box at a bank.

COMMUNITY EMERGENCY PLANS

Familiarize yourself with community evacuation plans and neighborhood escape routes. Post a copy of them in a highly visible place in your home.

THUNDERSTORM/TORNADO

- Remove dead branches from trees beforehand to avoid injury or damage.
- After seeing lightning, if you hear thunder in less than 30 seconds, it is recommended that you stay inside for 30 minutes after the thunder has ceased.
- The inside of a car is safer than the outside, as a lightning strike will simply pass through the car as long as you aren't in contact with any metal.
- Unplug all major appliances, as a power surge can cause serious damage.
- Avoid all tall structures and elevated areas as well as large amounts of metal.

FIRES

- Make sure that every level of your house has a smoke detector, and be sure to test them once a month. Have the family plan an emergency exit route.
- Always keep track of any stoves or high-temperature/high-voltage appliances that are running. Be sure to never leave any cooking unattended.
- Keep lighters and matches away from children.
- If a burn occurs, soak the skin in cool water. If the skin blisters, seek medical assistance.

⊕ Emergency First-Aid Tips ⊕

FIRST AID FOR CPR & HEART ATTACK

CPR

CPR is to be administered when a person is not breathing or has no pulse. Be quick to act by remembering the A,B,C's: Airway, Breathing & Circulation.

Airway:

Place the person on a firm surface, on their back. Kneel next to the person's neck and shoulders. Open the person's airway by tilting back the head and lifting the chin.

Breathing:

With the head tilted and chin lifted, pinch the nostrils shut and cover the person's mouth with yours. Give two slow breaths.

Circulation:

Find the hand position on the center of the breastbone. Place the heel of your hand on that position, with your other hand on top of the first hand. Use your upper body weight to push down. Give two compressions per second. Compress the chest at a rate equal to 100/minute. Perform 30 compressions at this rate. Repeat until an ambulance arrives.

HEART ATTACK

Symptoms of a heart attack may include any of the following:

- Uncomfortable pressure, fullness or squeezing pain in the center of the chest.
- Expanded pain in the upper abdomen.
- Shortness of breath.
- Pain or numbness in either arms, shoulders, neck, jaw or teeth.
- Dizziness or fainting.
- Nausea and sweating.

If you or someone else may be having a heart attack - follow these steps immediately:

- **DIAL 911**
- **Chew and swallow Aspirin (unless you are allergic/not allowed to)**
- **Take Nitroglycerin (only if prescribed)**
- **Begin CPR if the person is unconscious**

IN AN EMERGENCY, DIAL 911

⊕ *Emergency First-Aid Tips* ⊕

FIRST AID FOR BURNS & CHOKING

BURNS

For minor 1st and 2nd degree burns smaller than 3" in diameter: Cool the Burn. Run cool water over the burned area for 5 minutes, or until the pain diminishes. Never put ice on a burn!

Bandage the burn with sterile gauze:

It is important to use loosely wrapped gauze. This will avoid pressure and the bandage protects blisters. NEVER put lotions, vaseline, ointments or butter on burn. Do not break any blisters, which can cause infection.

Take Aspirin, Ibuprofen, Naproxen or Acetaminophen to relieve pain:

Minor burns usually heal with these basic treatments. Be aware for signs of infection which may include: increased pain, redness, fever, swelling or oozing. If symptoms develop, seek medical help. Avoid tanning the burned area for at least a year. Protect the area with sunscreen outdoors. Avoid giving aspirin to children.

For 3rd degree burns/all major burns - DIAL 911

DO NOT run cold water over large severe burns - this can cause shock.

DO NOT remove burnt clothing.

Check for signs of breathing/coughing/movement.

If there are no signs of breathing begin CPR.

Elevate burned areas above heart level, if possible.

Cover the burn(s) with cool, sterile, moist bandages, towels or cloth.

CHOKING

Most people clutch at their throats when choking, an obvious symbol for help. However, if a person isn't giving that signal, be alert for these indications. Inability to talk, difficulty breathing or noisy breathing, inability to cough forcefully, skin/lips/nails turning blue, loss of consciousness.

The Red Cross recommends a "five-and-five" method for first aid: First give five blows between the person's shoulders with the heel of your hand. Second, perform the Heimlich maneuver (abdominal thrusts) five times. Alternate between five back blows and five abdominal thrusts until the blockage is dislodged.

IN AN EMERGENCY, DIAL 911

⊕ *Emergency First-Aid Tips* ⊕

FIRST AID FOR INSECT BITES/ANAPHYLAXIS & POISON SAFETY

INSECT BITES/ANAPHYLAXIS

Anaphylaxis is a severe allergic reaction from insect bites (latex, food and drug allergies can also cause Anaphylaxis). Typical symptoms include hives, the swelling of lips or eyes, swollen throat, drop in blood pressure, light headedness, confusion, nausea or diarrhea. If someone is having an allergic reaction from an insect bite with these symptoms:

CALL 911.

Administer emergency prescription medication. See if the person is carrying special emergency allergy medicine and give it to them according to the directions.

Loosen tight clothing.

Lay the person down. The person should lay down on their back with feet elevated. Turn them on their side if they are vomiting or bleeding from their mouth to prevent them from choking.

If they are not breathing - administer CPR. Most insect bite reactions are mild and cause no allergic reaction. If stung by a bee, use a straight edged object, like a credit card, to scrape away the stinger. Don't use tweezers - they can pinch more venom out of the stinger. Apply an ice pack to the area and take an over the counter pain reliever.

POISON PREVENTION

Teach your children about poison and how it can look like a food or drink. They should always ask an adult before eating or drinking anything. Have them learn the poison control phone number: 1-800-222-1222 and keep it programmed or posted near all your phones. Here are some prevention tips.

Lock up your poisons and medications. Keep them out of the reach of children, lock them up if possible. Make sure your children understand that medicine is not candy.

Follow directions carefully. Read your labels. Be sure to use and store all poisons and medications properly according to recommendations.

Keep your pets safe from household chemicals, too. Don't allow pets near areas that have just been cleaned with chemicals, such as freshly mopped floors or bleached bathtubs and sinks. Clean up any antifreeze/coolant spills. Pets like the flavor but they can die if they ingest it. Store poisonous foods or plants in areas that your pets cannot access. Call your local emergency veterinary hospital if you believe your pet has been poisoned.

IN AN EMERGENCY, DIAL 911

Safety Tips for Parents & For Kids

PARENTS:

- Teach your kids that an emergency is when you need help from a doctor, a police officer or a firefighter.
- Designate a safe place by your house that a child can go to if they need help right away.
- Have your kids memorize your address and phone numbers. They should also know your full name and where you work.

KIDS:

FIRE SAFETY

- If you or someone else is on fire - remember to STOP, DROP and ROLL. Wrap a blanket on the person to help put out the fire.
- If there is a fire, leave the house as fast as you can! Crawl on the floor to avoid smoke and if the door is hot, don't open it - find another way out.
- Learn all the fire exits in your house. Assign a safe place outside for everyone to meet in case of a fire emergency.

HOME ALONE

- Never tell anyone that you are home alone.
- If someone calls and ask for your mom and dad, tell them "They cannot come to the phone right now, can you please call back later?"
- Do not answer the door, unless it is someone that you know your parents have okay'd them to come over.
