IRON COUNTY HISTOR

ron County was created in 1893 from Ashland and Oneida Counties, and it was named for the iron deposits near the lake. It usually gets around 200 inches of snow annually. There are over 500 miles of snowmobile trails and 175,000 acres of forests. Hurley is the county seat. Iron County is located in northwest Wisconsin and has a population of nearly 6,000.

Hurley

Hurley was founded to serve lumbermen and miners. Hurley and Gile were lumber towns, with many mining towns nearby. Hurley got its name from M. A. Hurley, an attorney of Wausau. In 1885, his first name was dropped and the community became known as simply Hurley instead of Glen Hurley. Henry Meade was Hurley's first mayor. John Ankers was Hurley's first town clerk, justice of the peace, and fire chief. In 1888 there were two large fires that destroyed most of the city, but the people recovered and it was rebuilt with brick and stone. He also opened Hurley's first saloon. Hurley was also the home of Delia Zarzyski, where she lived her entire life with her husband Leonard. They had three children, one of whome is Paul Zarzyski who performs across the country and has written poems and books. The population is about 1,500.

Montreal

The Montreal Mining Company had several copper and iron ore mines in the area, and is what Montreal was named after. Miners leased the land near the mine shaft, and the company began renting homes to the miners in 1918. The local mine closed in 1962 after operating for a century and shipping 45 million tons of iron ore. The National Register of Historic Places added many of these houses to their register in 1980. The ore deposits from the mines can still be seen off Highway 77. Today the population is about 800 people.

LAS COUNTY HISTORY

Ilas County was set off from Oneida County in 1893 by William Freeman Vilas. He was one of many people coming from New England as part of a wave of "Yankee" migrants who helped to found the state, and he served as senator from 1891 from 1897. The earliest people in the county were members of the Chippewa band of Native Americans, though migrants had constructed wagon roads and trails, as well as a logging industry in the area in the 1850s. The population is over 21,000 and the county seat is Eagle River.

VILAS COUNTY COMMUNITIES

Arbor Vitae

Arbor Vitae is one of the oldest towns in Vilas County, having been founded in the 1890s. Today the community focuses mainly on tourism, and has many cabins and campgrounds people can stay at. There are an abundance of outdoor activites for people to do. Many of the trails used today come from abandoned rail systems and logging roads. There is a population of over 3,000 in Arbor Vitae.

Boulder Junction

Railroad tracks were laid down in 1903, and this area would become Boulder Junction. While the railroads were used for the logging industry, many outdoorsman were also attracted by them. Tourism grew and resorts were built to accommodate all the people. The population is almost 1,000.

Eagle River

Eagle River's name comes from the high amount of eagles nesting along the river. In 1857 numerous families moved into the area, creating a settlement. In 1885, the town of Eagle River was created because so many of the families were very involved in the community and were continuing what the original settlers had started. Today the city is a popular vacation and retirement destination. The Eagle River population is over 1,000.

GOGEBIC COUNTY HISTORY

n 1871, Prof. Raphael Pumpelly of Harvard University, possibly the first professionally trained mining engineer in the United States, discovered iron ore in what would later become Gogebic County. He came to this iron range by sailboat and then traveled 20 miles south by land to the site in Ironwood near the abandoned gas plant. After establishing camp in tents, Pumpelly noticed yellow stains on rocks. After this discovery, he and his financial backers purchased two miles, which in later years became the site of the Newport and Geneva iron mines. The population of Gogebic is over 16,000 and the county seat is Bessemer.

Watersmeet

Bessemer (County Seat)

In 1884, when the community began there was a neaby mine called Bessemer which the town was named after. The mine itself had been named after a British metallurgist, named Henry Bessemer. Today the city has a population of nearly 2,000.

Ironwood

The town of Ironwood was settled in 1885. In the 1870s iron ore had been discovered but it wasn't until the railroad opened that people were able to extensively explore the deposits of ore. Several mines were discovered and with the addition of lumber works in the area, many immigrants were drawn to Ironwood. The town's name is generally considered to have come from a mining captain by the name of James Wood.

Wakefield

Wakefield was platted in 1886 by George M. Wakefield. Much of the reason for founding Wakefield was because of the discovery of iron on the east end of Sunday Lake. This discovery brought in many mining companies, and many nearby cities such as Plymouth and Pike are also named after these mines. The Sunday Lake Mine closed in 1961, and with the mining jobs gone, many goods and service jobs opened, along with the forest industry and tourism becoming a much bigger part of the economy.

TORNADO SAFETY

- · KNOW WHERE YOU CAN TAKE SHELTER IN SECONDS.
- Have a place, everyone knows, to go to after
- THE STORM HAS PASSED.
- FLYING DEBRIS IS THE BIGGEST DANGER DURING A TORNADO. YOUR SHELTER SPACE SHOULD HAVE MATTRESSES OR THICK BLANKETS AROUND, TO PROTECT YOURSELVES.
- DO NOT OPEN YOUR WINDOWS TO TRY & EQUALIZE THE PRESSURE." THIS ONLY MAKES IT
- EASIER FOR DEBRIS TO INJURE YOU.

 ALSO, STAY AWAY FROM WINDOWS!

- CONSTANT ROTATION OF THE CHOUDS BASE.
- · FLYING/ROTATING DEBRIS UNDER THE CLOUD. Tornados Don't Always have a visible funnel.
- Heavy Rain or Hail followed by either by an eerie Calm in the storm or Rapid wind changes & SHIFTS.
- · LISTEN FOR LOUD, CONTINUOUS RUMBLING WITH NO BREAKS IN IT LIKE THUNDER.

You can figure out how far away the LIGHTNING IS FROM YOU LIKE THIS... Count the seconds inbetween the flash OF LIGHTNING & THE CRACK OF THUNDER. DIVIDE THE NUMBER OF SECONDS BY 5 & YOU HAVE YOUR DISTANCE IN MILES.

O SECONDS O MILES

5 SECONDS 1.08 MILES

4.35 MILES

20 SECONDS 60 SECONDS 13.06 MILES

ICE SAFETY GUIDELINES:

ICE THAT IS 2" OR LESS

IS UNSAFE TO WALK ON. STAY AWAY FROM THIN ICE!

ICE THAT IS 4" OR MORE IS OKAY TO WALK ON

ICE THAT IS 6" OR MORE IS OKAY TO DRIVE **SNOWMOBILES** OR ATV'S ON

ICE THAT IS 12" OR MORE IS OKAY TO DRIVE SMALL CARS ON

ICE THAT IS 15" OR MORE IS OKAY TO DRIVE MEDIUM SIZED TRUCKS ON

15"

THERE IS NO SUCH THING AS 100% SAFE ICE!!!

Did you know?

- · Ice always forms unevenly. It can be 2 feet thick in one spot, and just a few inches thick a couple feet away.
- · The most dangerous ice is formed over flowing water. It's especially dangerous near streams, culverts and bridges. Also, the faster the water is running, usually means the weaker the ice will be.
- · Snow insulates the ice and slows the freezing process. The added weight of the snow reduces the strength of the ice. Also, ice that is closer to shore is usually weaker than ice farther out.
- · Cracking and rumbling ice isn't always bad. The ice expands and contracts as the temperature rises and falls.
- Fish and birds/wildlife can also effect the ice. Schools of fish can bring warm water from the bottom of lakes, and open holes in seemingly thick ice.
- ALWAYS BE CAUTIOUS WHEN YOU ARE ON ICE!

715-479-6456

Trees for Tomorrow is a nonprofit speciality school that teaches the management of trees and forests and develops knowledge and skills relating to lifestyle decisions.

Operating Watercraft

FOLLOW THESE GUIDELINES TO HELP PREVENT AND PREPARE FOR CAPSIZING, SWAMPING, OR SOMEONE FALLING OVERBOARD.

• Make sure that you and your passengers are wearing lifeJackets while the boat is moving. • Attach the ignition safety
Lanyard to your wrist, clothes, or life Jacket. • Don't allow
anyone to sit on the gun wale, bow, seat backs, motor cover,
or areas not designed for seating. Also, don't let anyone sit
on pedestal seats when craft is not in idle. • Don't overload
your boat. Balance the load of passengers and gear stored
on-board. • Keep your center of gravity low by not allowing
people to stand up or move around while craft is in motion.
• In small boats, don't allow anyone to lean beyond the gunwale. • Turn boat at slow rates of speed. • Secure the anchor
line to the bow, never to the stern. • Don't risk operating
water craft in rough conditions or bad weather.

Who May Operate a Motorboat

(OTHER THAN A PERSONAL WATERCRAFT)

- For engines 25 horsepower or less:
- Those under age 12 may operate without restrictions.
- FOR ENGINES OVER 25 HORSEPOWER THROUGH 75 HORSEPOWER:
- Those under age 12 must have someone 21 years of age or older on board within reach of the controls.
- For engines over 75 horsepower:
- No CHILDREN UNDER AGE 12 MAY OPERATE, EVEN WITH AN ADULT ON BOARD.
- OTHER RESTRICTIONS APPLY TO BOAT OPERATORS 12 TO 17 YEARS OLD:
- OPERATORS FROM 12 TO 17 YEARS OF AGE MAY OPERATE ENGINES OF 25 HORSEPOWER OR LOWER WITH NO RESTRICTIONS.
- For engines over 25 Horsepower:
- OPERATORS 12 TO 17 YEARS OF AGE MUST HAVE: A WATERCRAFT OPERATOR'S PERMIT, OR SOMEONE AGE 21 YEARS OR OLDER OLD ON BOARD WITHIN REACH OF THE CONTROLS.

All Watercraft Must Have...

- AT LEAST ONE COAST GUARD APPROVED TYPE 1, 2, 3 OR 5 FLOTATION DE-VICE THAT IS THE PROPER SIZE FOR EACH PERSON ON BOARD OR BEING TOWED.
- ALL DEVICES MUST BE IN GOOD CONDITION AND EASILY ACCESSIBLE.
- CHILDREN UNDER AGE IO MUST WEAR A DEVICE WHEN ON BOARD A BOAT THAT IS UNDERWAY UNLESS:

IN AN ENCLOSED CABIN OR BELOW DECK OR ON AN ANCHORED BOAT THAT IS BEING USED FOR SWIMMING OR DIVING OR PASSENGER CRAFT WITH A LICENSED CAPTAIN.

- ALONG WITH THE ABOVE AT LEAST ONE APPROVED TYPE 4 MUST BE ON BOARD BOATS I6 FT. OR LONGER (EXCEPT CANOES AND KAYAKS) AND IMMEDIATELY AVAILABLE.
- A Coast Guard approved Type 5 device may be substituted for any other Coast Guard approved device if it meets the same requirements and is noted on the label.
- Anyone riding a jet ski or other Personal Water Craft must wear an approved -non inflating flotation device, as well as anyone being towed by a water craft.

Bicycle Hand Signals

Snowmobile Hand Signals

Communication is an essential part of safe riding. Hand signals are a practical way to communicate between other riders and traffic.

Be sure to give easy to see and clear hand signals when snowmobiling. Hand signals should never be subtle, but always deliberate.

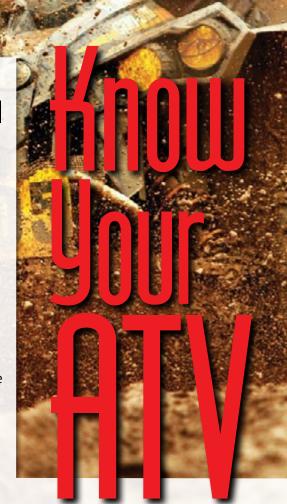

Read the owner's manua

and know your vehicle thoroughly.

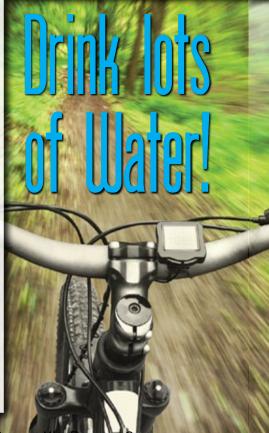

- Check your vehicle before you ride.
- Wear protective equipment and clothing. Don't lend your vehicle to unskilled riders. Supervise young or inexperienced riders. Never carry a passenger on vehicles meant for one rider. Do not operate under the influence of drugs or alcohol. Drive at speeds that are appropriate to trail conditions. Stay to the right on trails.
- Stay away from thin ice, open water and wetlands • Know the weather forecast. • Make sure headlights and taillights work properly. • Maintain safe distances between other riders. • Reduce your speed when riding at night.
- Yield to other motor vehicles and trail users.
 Young or beginning riders are encouraged to take a safety training course.

SNOWMOBILE SAFETY

Please respect private property

· Always wear a properly fitting bike helmet as most serious injuries are to the head. • Be sure your handlebars, seat and wheels fit snugly. • Keep your bike in good shape by checking and oiling your chain, making sure your brakes work properly and maintaining your tire pressure. • Always ride with both hands on the handlebars except when doing turn signals. • When leaving a driveway, curb or alleyway always stop and check for traffic in both directions. • Cross only at intersections. • Use the crosswalk to walk your bike across busy intersections and follow the traffic signals. • Never ride against traffic. Travel in the same direction as the cars. • Whenever you can, use bike routes and avoid busy streets. • Don't ride near parked cars as doors can open and cause accidents. • Obey all traffic signs and traffic lights. • When biking with friends, ride in a single file. • Always pass other bikers or pedestrians on the left and say "On your left!" to make your presence known. · Always use bicycle hand signals to alert traf-

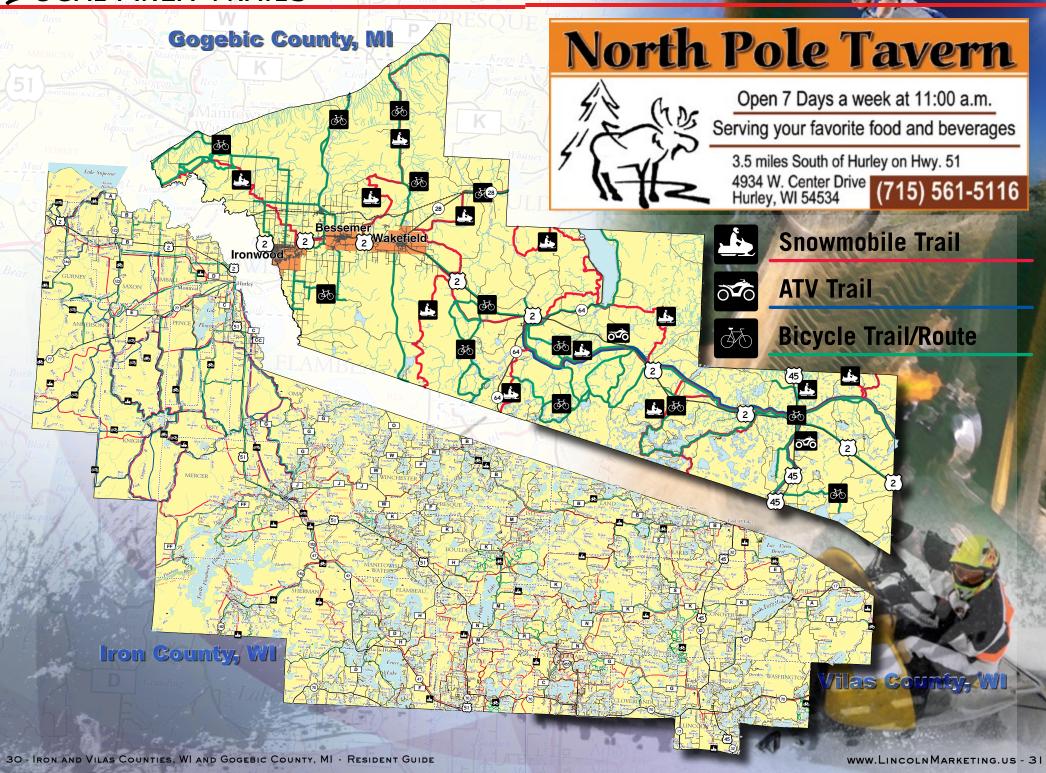

and no trespassing signs. **PRIVATE** Stay on trails. PROPERT' Exercise extreme caution on all NO TRESPASSING lakes and streams. Obey all state and local laws and ordinances. Do not operate snowmobiles/ATV's on county roads or state

highways.

• Do not consume alcohol or take drugs prior to or during your snowmobile trip. Doing so increases your chances of injury or death. Slow down and don't cut to the inside of the trail corners. It's dangerous and illegal. • If you snowmobile at night, don't override your lights. • Always use the buddy system. Never ride off alone. • Drowning is one of the causes of many snowmobile fatalities. Whenever possible, avoid the ice. • Wear sensible, protective clothing designed for operating a snowmobile. • Use a full size helmet, goggles, or visor to prevent injuries from twigs, stones, ice chips and other debris. • Avoid wearing long scarves. They may get caught in moving parts of the snowmobile. • Know the terrain you are going to ride. If unfamiliar to you, ask someone who has traveled over it before. • Know the weather forecast, especially the ice and snow conditions. • Be sure your snowmobile is in top-notch mechanical condition throughout the months of use. • Familiarize yourself with the snowmobile you are driving. Thoroughly read the manual that accompanies the snowmobile. • Do not pursue domestic or wild animals. That is not the conduct of a sportsman. Report such violations to the nearest law enforcement officer.

SIOW Down! Snowmobiling is fun. Going to the hospital isn't.

fic of your changing direction.

10 Tips for Green Thumb GARDENING

Don't like all the dirt in your fingernails while you work in the garden? Before you go out, run your fingernails across a bar of soap and you'll effectively seal the undersides of your nails so dirt cannot accumulate. Then, after you are all done gardening, use a toothpick or nailbrush to remove the soap and your nails will be sparkling clean.

Spray vegetable oil on your string trimmer to help prevent jamming or breaking (Treat before installing string in trimmer).

Make a convenient measuring tool out of a long handled garden tool by laying it on the ground next to a tape measure. Use a permanent marker to copy the inches and feet. Next time you are spacing plants you already have a dual-purpose measuring tool in your hand!

Write the names of your plants (with a permanent marker) on the flat parts of stones of any size and lay them in front of your plants for natural looking markers.

The next time you boil or steam vegetables, use the leftover water to water potted patio plants, and you'll be suprised at how the plants grow with "vege-soup."

You can use leftover tea and coffee grounds to help acidify the soil of acid-loving plants like azaleas, rhododendrons, camellias, gardenias and blueberries. A light sprinkle of about 1/4 of an inch applied once a month will help keep the pH of the soil on the acidic side.

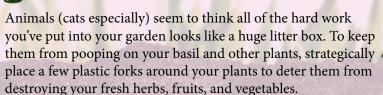

You can use chamomile tea to control damping-off fungus, which often attacks young seedlings quite suddenly. Just add some tea to the soil around the soil of seedlings once a week for healthy plant.

Here is a really quick way to dry out your herbs: Just lay a sheet of newspaper on the seat of your car, arrange the herbs in a single layer, then roll up the windows and shut the car doors. Your herbs will be dry in no time!

Use your blender to grind up egg shells. Just like a mother bird chews up worms for the baby birds making the food easier to digest, grinding eggshells makes it easy for your garden to absorb the calcium egg shells retain.

SAFETY TIPS

PARENTS:

- Teach your kids that an emergency is when you need help from a doctor, a police officer or a firefighter.
- Designate a safe place by your house that a child can go to if they need help right away.
- Have your kids memorize your address and phone numbers. They should also know your full name and where you work.

KIDS:

FIRE SAFETY

- If you or someone else is on fire remember to STOP, DROP and ROLL. Wrap a blanket on the person to help put out the fire.
- If there is a fire, leave the house as fast as you can! Crawl on the floor to avoid smoke and if the door is hot, don't open it - find another way out.
- Learn all the fire exits in your house. Assign a safe place outside for everyone to meet in case of a fire emergency.

HOME ALONE

- Never tell anyone that you are home alone.
- If someone calls and asks for your mom and dad, tell them "They cannot come to the phone right now, can you please call back later?"
- Do not answer the door, unless it is someone that
 you know your parents have okay'd
 them to come over.

FIRST AID FOR INSECT BITES/ANAPHYLAXIS & POISON SAFETY

INSECT BITES/ANAPHYLAXIS

Anaphylaxis is a severe allergic reaction from insect bites (latex, food and drug allergies can also cause Anaphylaxis). Typical symptoms include hives, the swelling of lips or eyes, swollen throat, drop in blood pressure, light headedness, confusion, nausea or diarrhea. If someone is having an allergic reaction from an insect bite seek medical attention immediately.

POISON PREVENTION

Teach your children about pois<mark>on and how it ca</mark>n look like a food or drink. They should always ask an adult before eating or drinking anything. Have them learn

the poison control phone number: 1-800-222-1222 and keep it programmed or posted near all your phones. Here are some prevention tips.

Lock up your poisons and medications. Keep them out of the reach of children, lock them up if possible. Make sure your children understand that medicine is not candy.

Follow directions carefully. Read your labels. Be sure to use and store all poisons and medications properly according to recommendations.

Keep your pets safe from household chemicals,

too. Don't allow pets near areas that have just been cleaned with chemicals, such as freshly mopped floors or bleached bathtubs and sinks. Clean up any antifreeze/coolant spills. Pets like the flavor but they can die if they ingest it. Store poisonous foods or plants in areas that your pets cannot access. Call your local emergency veterinary hospital if you believe your pet has been poisoned.

FIRST AID FOR BURNS & CHOKING

BURNS

For minor 1st and 2nd degree burns smaller than 3" in diameter: Cool the Burn. Run cool water over the burned area for 5 minutes, or until the pain diminishes. Never put ice on a burn!

Bandage the burn with sterile gauze:

It is important to use loosely wrapped gauze. This will avoid pressure and the bandage protects blisters. NEVER put lotions, vaseline, ointments or butter on burn. Do not break any blisters, which can cause infection.

Take Aspirin, Ibuprofen, Naproxe<mark>n or Acetaminop</mark>hen to relieve pain:

Minor burns usually heal with these basic treatments. Be aware for signs of infection which may include: increased pain, redness, fever, swelling or oozing. If symptoms develop, seek medical help. Avoid tanning the burned area for at least a year. Protect the area with sunscreen outdoors. Avoid giving aspirin to children.

For 3rd degree burns/all major burns - DIAL 911
DO NOT run cold water over large severe burns - this can cause shock.
DO NOT remove burnt clothing.
Check for signs of breathing/coughing/movement.
If there are no signs of breathing begin CPR.
Elevate burned areas above heart level, if possible.

Cover the burn(s) with cool, sterile, moist bandages, towels or cloth.

CHOKING

Most people clutch at their throats when choking, an obvious symbol for help. However, if a person isn't giving that signal, be alert for these indications. Inability to talk, difficulty breathing or noisy breathing, inability to cough forcefully, skin/lips/nails turning blue, loss of consciousness.

The Red Cross recommends a "five-and-five" method for first aid: First give five blows between the person's shoulders with the heel of your hand. Second, perform the Heimlich maneuver (abdominal thrusts) five times. Alternate between five back blows and five abdominal thrusts until the blockage is dislodged.

IN AN EMERGENCY, DIAL 911
