Price County History (Phillips, County Seat)

Price County was established in 1879 from parts of Lincoln and Chippewa Counties, and was named in honor of William T. Price who served in the United States Congress. Railroad expansion was instrumental in the development of Price County as goods and services were easily transported. Early industry was led by lumbering as logging camps grew to become villages and later cities. Phillips was selected as the county seat and the area continued to thrive. As logging began to slow, residents turned towards agriculture who raised livestock and grew crops. By 1910 the population of Price County had reached 13,795 and the area has since become a haven for recreational enthusiasts. Today Price County is home to approximately 20,689 residents.

OGEMA - pop. 186

**Populations are approximate.*

CATAWBA

Catawba began as a lumbering camp upon the construction of the railroad in 1884. Its name was derived from Catawba wine, which was the popular drink of many local railroad workers and lumbermen at the time. By 1910 the area boasted a sawmill, hotel, general store and a variety of specialty shops. Residents of Catawba and nearby Kennan now celebrate Lumberman's Day each year in honor of their first settlers. Today Catawba is home to approximately 149 residents.

KENNAN

Kennan was established as a railway station and named after K.K. Kennan who platted streets in 1886. The community grew slowly and by 1890 it was home to 20 residents. Early businesses included a sawmill, post office and newspaper office with W.W. Yarham serving as editor. As the sawmill expanded, Kennan continued to develop. Today Kennan is home to approximately 171 residents.

Price County Communities

PARK FALLS

First known as Muskellunge Falls, Park Falls was settled in 1877 as rail lines were completed. The community grew quickly and was renamed Park Falls due to the ample trees and its resemblance of a park. A sawmill, post office, school, newspaper office, church, manufacturing centers, hotels and general stores were thriving by 1900 and its population reached 750. Park Falls was incorporated as a village the following year and then as a city in 1912. The area is now widely recognized as the home to St. Croix rods, established in 1948, which has become one of the world's premier fishing rod manufacturers. Today Park Falls is home to approximately 2,462 residents.

PHILLIPS (COUNTY SEAT)

Phillips was established as a railway station and named for an officer of the railroad. In 1876 streets were platted and a post office was constructed with Edward H. Alverson serving as its first postmaster. By 1879 Phillips was selected as the county seat and the community continued to expand. Within five years a school, church, lumberyard, manufacturing center and general stores were thriving and Phillips was incorporated in 1891. Today Phillips is home to approximately 1,675 residents.

PRENTICE

Prentice was founded as a lumbering camp in 1882 and named for A. Prentice who was instrumental in its development. In 1887 the railroad arrived and the area grew quickly. Businesses were established to meet the growing needs of its residents which included a hotel, general store, tannery and an assortment of specialty shops. Fire destroyed most of the business district in 1894, but residents rebuilt resiliently. In 1899 Prentice was incorporated and the area has continued to prosper. Today Prentice is home to approximately 626 residents.

Taylor County History (Medford, County Seat)

Taylor County was established in 1875 from parts of Lincoln, Chippewa, Clark and Marathon Counties, and named in honor of William E. Taylor who served as Governor of Wisconsin. Railroad expansion was instrumental in the development of Taylor county as goods and services were easily transported. Early industry was led by lumbering as logging camps grew to become villages and later cities. Medford was selected as the county seat the area continued to thrive. As logging began to slow, residents turned towards agriculture who raised livestock and grew crops. By 1910 the population of Taylor County had reached 13,641 and the area has since become a haven for recreational enthusiasts. Today Taylor County is home to approximately 20,689 residents.

**Populations are approximate.*

GILMAN

Gilman was settled in 1902 as a rail station named in honor of Sally Gilman, who was the wife of the president of the local lumber company. A mill was constructed which prompted growth and the first hotel was built by J. McSloy soon after. A school followed and streets were platted in 1905. By 1914 Gilman was incorporated and businesses included a general store, newspaper office, cheese factory and an assortment of organizations. Today Gilman is home to approximately 474 residents.

Taylor County Communities

LUBLIN

Lublin was established as a lumbering village on land belonging to Henry Putnam, George Burnham and the Eau Claire Lumber Company. Marion Durski was influential in the development of the community as he platted streets and provided land for the railroad. Early businesses included mills, general stores, grocery stores, factories and specialty shops. Today Lublin is home to approximately 110 residents.

MEDFORD (COUNTY SEAT)

Railroad expansion prompted settlement in 1873 and the community was named after Medford, Massachusetts. Ample timber supplied local sawmills and businesses were established to meet the growing needs of its residents. Medford continued to flourish until a fire destroyed most of the business district in 1893. Residents rebuilt resiliently and Medford was incorporated and selected as the county seat. By 1923 the community boasted one of the largest co-op creameries in the state and has become the industrial center for Taylor County. Today Medford is home to approximately 4,326 residents.

RIB LAKE

Rib Lake was founded by John J. Kennedy as he arrived to establish the Rib Lake Lumbering Company in 1882. A mill was established which became one of the most prominent mills in all of Wisconsin at the time. Businesses soon included a tannery, newspaper office, hotels and general stores and Rib Lake began to develop. In 1902 Rib Lake was incorporated and has since become a destination for recreational enthusiasts due to the ample lakes and public land found throughout the area. Today Rib Lake is home to approximately 878 residents.

STETSONVILLE

Stetsonville was settled in 1872 as rail lines were completed throughout the area. Ample timber attracted residents and the first mill was established by Isiah Stetson in 1875. The community was named in his honor and a post office was founded with Peter Liberty serving as first postmaster. By 1914 Stetsonville housed a bank, schools, churches and the area has continued to prosper. Today Stetsonville is home to approximately 563 residents.

12/30	Sunday	@ Minnesota Vikings	12:00 p.m.	FOX

*Dates and start times are subject to change.

HISTORY

The Green Bay Packers were founded by the Indian Packing Company in 1919 and led by Earl Lambeau. Within two years the team was allowed into the National Football League and the first stadium, City Stadium, was constructed in 1925. The Packers played there until 1957 when construction began on Lambeau Field, named in honor of legendary Earl "Curly" Lambeau who brought the team to multiple championships as a player and as head coach. The Green Bay Packers have won 13 championships, multiple division titles and have almost 20 players and coaches inducted into the Pro Football Hall of Fame - more than any other team in the league. Lambeau Field, the current home of the Packers, has hosted 55 years of Packers football and has witnessed multiple renovations throughout its history allowing for its current 73,000 seating capacity. The stadium is known as one of the toughest venues to play in due to the harsh Wisconsin winters. Since 1960 season tickets have remained sold out with almost 90,000 people on the waiting list. The Green Bay Packers are now the only non-profit and community owned team within the league and is the third oldest team in professional football today. They have witnessed trial and triumph and continue to be one of football's dynasties.

Hunting Safety

All hunters should consider taking an advanced hunter education class to learn the latest hunting techniques along with tips on coming home alive.

Here are five suggestions for a safe and successful hunting experience:

1. Get a detailed map of the area you are hunting, review it before you leave, and carry it with you in the field.
2. Carry a compass and know how to use it. Decide ahead of time the direction to head for if you get lost or disoriented.
3. Weather can change quickly in Wisconsin, so hunters should carry a simple survival kit and be prepared for an unexpected overnight stay in the field. The survival kit should contain a rope, a knife, water, waterproof matches, an emergency shelter, and first aid supplies.
4. If you are on the water, make sure to wear a personal flotation device (life preserver).
5. Know your hunting partners' physical and emotional limitations, as well as your own, and don't push your partners or yourself beyond those limits.

Boating Safety

Operating Watercraft

Follow these guidelines to help prevent and prepare for capsizing, swamping, or someone falling overboard.

Make sure that you and your passengers are wearing life jackets while the boat is moving.

Attach the ignition safety lanyard to your wrist, clothes, or life jacket.

Don't allow anyone to sit on the gunwale, bow, seat backs, motor cover, or areas not designed for seating. Also, don't let anyone sit on pedestal seats when craft is not in idle.

Don't overload your boat. Balance the load of passengers and gear stored on-board.

Keep your center of gravity low by not allowing people to stand up or move around while craft is in motion.

In small boats, don't allow anyone to lean beyond the gunwale.

Turn boat at slow rates of speed.

Secure the anchor line to the bow, never to the stern.

Don't risk operating water craft in rough conditions or bad weather.

Boating Safety

Know Your Craft

Who May Operate a Motorboat (Other Than a Personal Watercraft)

For engines 25 horsepower or less:

Those under age 12 may operate without restrictions.

For engines over 25 horsepower through 75 horsepower:

Those under age 12 must have someone 21 years of age or older on board within reach of the controls.

For engines over 75 horsepower:

No children under age 12 may operate, even with an adult on board.

Other restrictions apply to boat operators 12 to 17 years old:

Operators from 12 to 17 years of age may operate engines of 25 horsepower or lower with no restrictions.

For engines over 25 horsepower:

Operators 12 to 17 years of age must have:

A watercraft operator's permit, or someone age 21 years or older on board within reach of the controls.

Snowmobile Safety

Do not consume alcohol or take drugs prior to or during your snowmobile trip. Doing so increases your chances of injury or death.

Slow down and don't cut to the inside of the trail corners. It's dangerous and illegal.

If you snowmobile at night, don't override your lights.

Always use the buddy system. Never ride off alone.

Drowning is one of the causes of many snowmobile fatalities. Whenever possible, avoid the ice.

Wear sensible, protective clothing designed for operating a snowmobile.

Use a full size helmet, goggles, or visor to prevent injuries from twigs, stones, ice chips and other debris.

Avoid wearing long scarves. They may get caught in moving parts of the snowmobile.

Know the terrain you are going to ride. If unfamiliar to you, ask someone who has traveled over it before.

Know the weather forecast, especially the ice and snow conditions.

Be sure your snowmobile is in top-notch mechanical condition throughout the months of use.

Familiarize yourself with the snowmobile you are driving. Thoroughly read the manual that accompanies the snowmobile.

Do not pursue domestic or wild animals. That is not the conduct of a sportsman. Report such violations to the nearest law enforcement officer.

Common Trail Signs

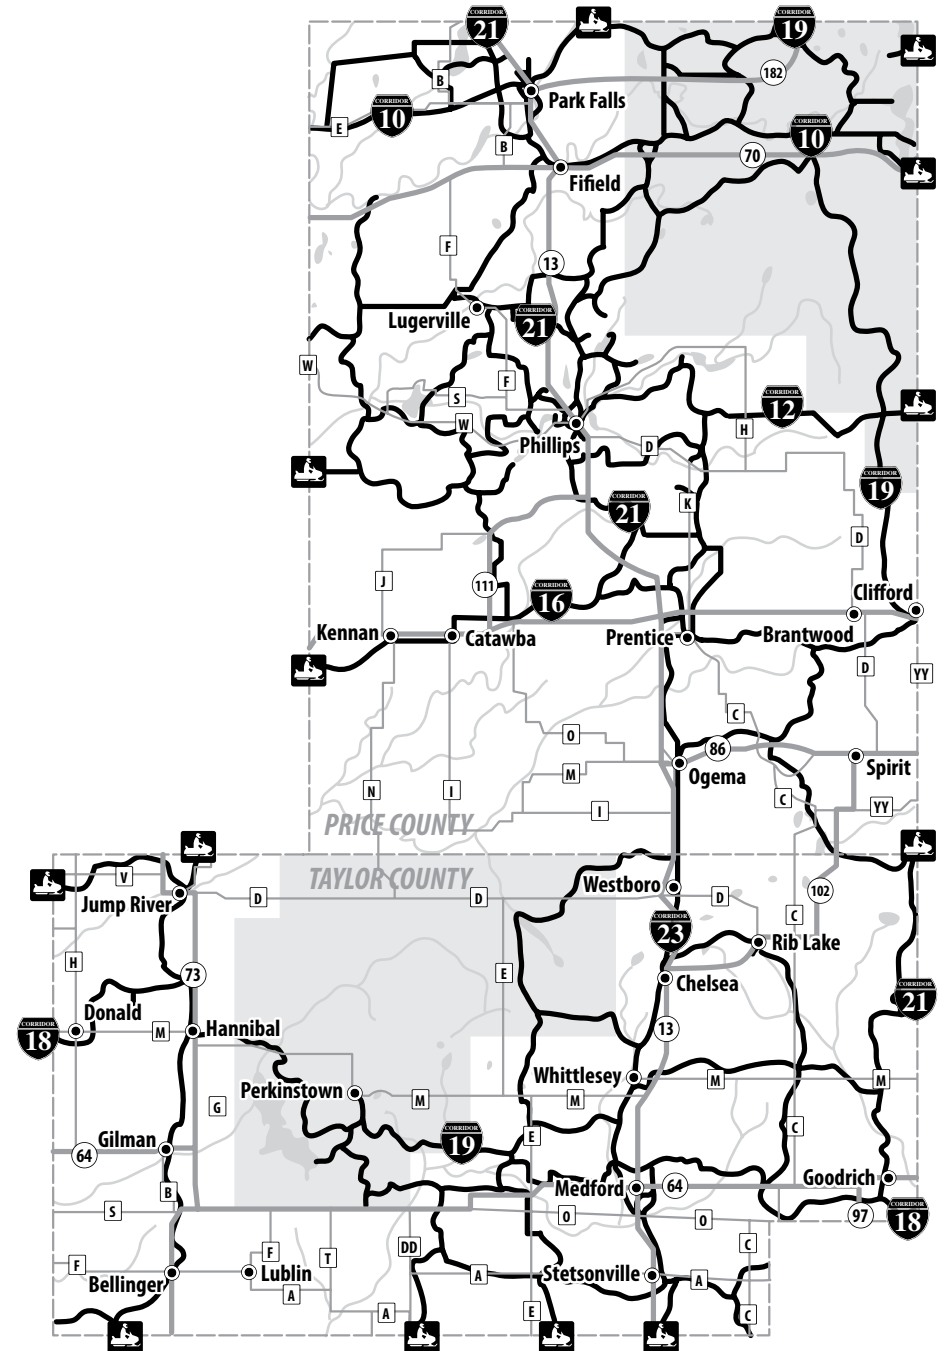

Snowmobile Safety

Communication is an essential part of safe riding. Hand signals are a practical way to communicate between other riders and traffic.

Be sure to give easy to see and clear hand signals when snowmobiling. Hand signals should never be subtle, but always deliberate.

Snowmobile Trails

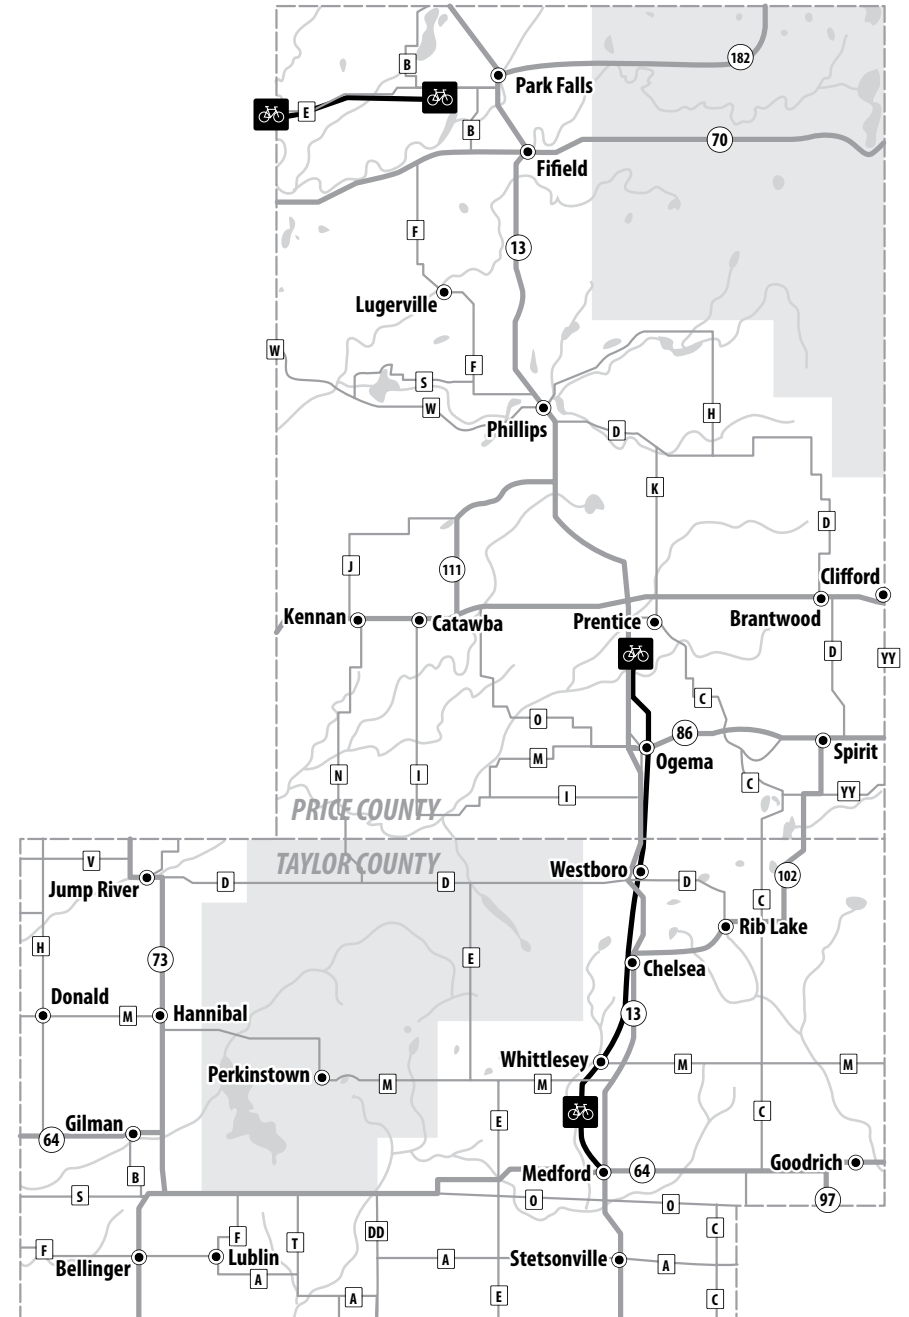

Bicycle Safety

- Always wear a properly fitting bike helmet as most serious injuries are to the head.
- Be sure your handlebars, seat and wheels fit snugly.
- Keep your bike in good shape by checking and oiling your chain, making sure your brakes work properly and maintaining your tire pressure.
- Always ride with both hands on the handlebars except when doing turn signals.
- When leaving a driveway, curb or alleyway always stop and check for traffic in both directions.
- Cross only at intersections.
- Use the crosswalk to walk your bike across busy intersections and follow the traffic signals.
- Never ride against traffic. Travel in the same direction as the cars.
- Whenever you can, use bike routes and avoid busy streets.
- Don't ride near parked cars as doors can open and cause accidents.
- Obey all traffic signs and traffic lights.
- When biking with friends, ride in a single file.
- Always pass other bikers or pedestrians on the left and say "On your left!" to make your presence known.
- Always use bicycle hand signals to alert traffic of your changing direction.

Bicycle Trails

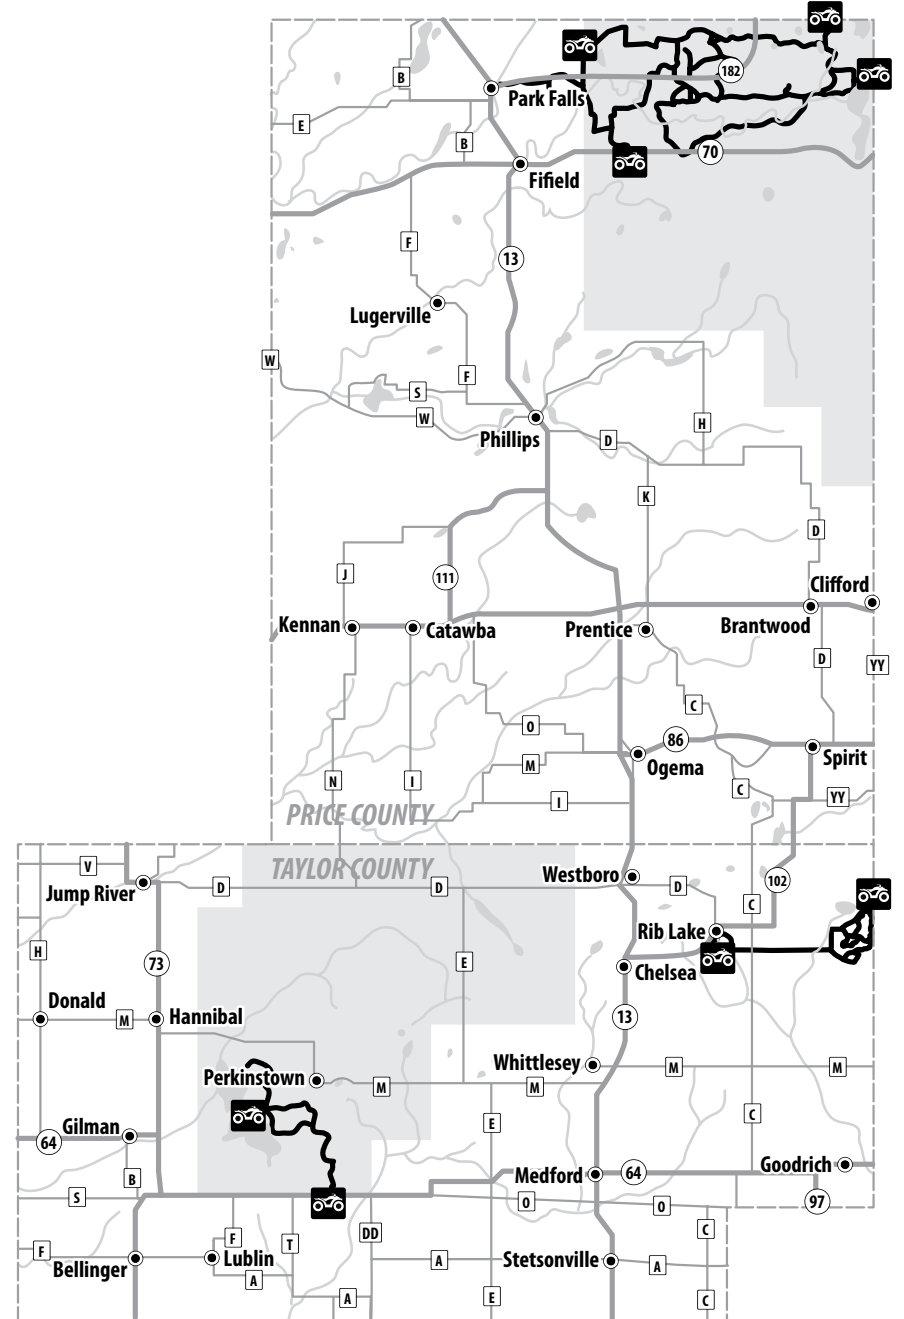

ATV Safety

- Read the owner's manual and know your vehicle thoroughly.
- Check your vehicle before you ride.
- Wear protective equipment and clothing.
- Don't lend your vehicle to unskilled riders.
- Supervise young or inexperienced riders.
- Never carry a passenger on vehicles meant for one rider.
- Do not operate under the influence of drugs or alcohol.
- Drive at speeds that are appropriate to trail conditions.
- Stay to the right on trails.
- Stay away from thin ice, open water and wetlands
- Know the weather forecast.
- Make sure headlights and taillights work properly.
- Maintain safe distances between other riders.
- Reduce your speed when riding at night.
- Yield to other motor vehicles and trail users.
- Young or beginning riders are encouraged to take a safety training course.

ATV Trails

Home Safety

- Keep the outside of your home well-lit. Motion sensors and timers help deter burglars.
- Dead-bolts and peep-holes should be placed on all outside doors.
- Windows and sliding glass doors should have locks and be in good working order.
- Keep your garage door closed.
- Use an engraver to mark computers, cameras, stereos, TV's, tools, yard equipment, etc.
- Never leave valuables, expensive jewelry, or large amounts of cash at home. If you must, keep a list of your valuables with serial numbers to assist in insurance claims.
- Keep your car locked at all times and store all valuables out of sight.
- Guns should always be stored unloaded and with a gunlock.
- Become part of a neighborhood watch or program that is similar.
- Be suspicious of unusual people or vehicles in your neighborhood. Document the date, time, description and license plate number to give to law enforcement if needed.
- When on vacation, do not advertise your absence. Stop mail and newspaper delivery. Have a trusted friend or neighbor to give the impression you are home by stopping by to take out trash, shovel snow, mow the lawn, etc.

Carbon Monoxide Safety

PREVENTION

- Install carbon monoxide detectors near every bedroom, gas appliance and in your RV, camper or motor home and test them monthly.
- Have flues, chimneys and all fuel-burning appliances inspected by a professional annually.
- Make sure fireplaces, wood stoves, dryers, furnaces and water heaters are properly vented to the outside.
- Only burn clean and untreated wood.
- Never idle your car or gas powered vehicle in the garage, with or without the garage door open.
- Toxic fumes build up quickly and can easily contaminate your home.
- Never use gas-powered engines like weed trimmers, snow blowers, chain saws, lawnmowers or portable generators in enclosed areas.
- Never use a charcoal grill indoors or in any closed area.
- Never use a gas oven to heat your home.
- Never sleep in a room or area heated with a gas or kerosene space heater that does not have proper ventilation.

SYMPTOMS

- Headaches, severe fatigue, vomiting, nausea, muscle and joint pain, dizziness, tingling, vertigo
- Attention and multi-tasking problems, short-term memory problems, word-finding problems
- Irritability, temper, loss of interest, sleep disturbance, anxiety, lack of motivation
- Eating and swallowing difficulties, vision problems, lack of muscular coordination, speaking difficulty, ringing in the ears
- Seizures, tremors, balancing problems, shortness of breath

Carbon monoxide poisoning is easily confused with flu-like symptoms. Serious long-term health risks or death can result if warning signs are ignored. Carbon monoxide can affect you for days, weeks, months or years. High levels of carbon monoxide can be fatal within minutes.

TREATMENT

- Immediately take the victim out to fresh air.
- If the victim cannot be removed, open every window and door.
- All appliances should be turned off.
- Take the victim to an emergency room as quickly as fast as possible, or call 911.

Emergency Planning

ESCAPE ROUTES

Everyone in your family should know the best ways to exit the house in case of a disaster. Teach your young children how to open sliding doors, windows and other exits. Designate a meeting place where the family can gather after escaping from the house.

FLASHLIGHTS

The whole family needs to know where to find flashlights. Periodically check the batteries.

FULLY CHARGED CELL PHONES

All family members should keep their cell phones charged. Make a habit of charging them, while everyone is asleep. Cell phones can be lifesavers in emergencies.

LIST OF VALUABLES

Keep this document listing your possessions (and if possible, a video of your home interior) in a fireproof safe, or in a safe deposit box at a bank.

COMMUNITY EMERGENCY PLANS

Familiarize yourself with community evacuation plans and neighborhood escape routes. Post a copy of them in a highly visible place in your home.

FIRST AID FOR CPR & HEART ATTACK

CPR

CPR is to be administered when a person is not breathing or has no pulse. Be quick to act by remembering the A,B,C's: Airway, Breathing & Circulation.

Airway:

Place the person on a firm surface, on their back. Kneel next to the person's neck and shoulders. Open the person's airway by tilting back the head and lifting the chin.

Breathing:

With the head tilted and chin lifted, pinch the nostrils shut and cover the person's mouth with yours. Give two slow breaths.

Circulation:

Find the hand position on the center of the breastbone. Place the heel of your hand on that position, with your other hand on top of the first hand. Use your upper body weight to push down. Give two compressions per second. Compress the chest at a rate equal to 100/minute. Perform 30 compressions at this rate. Repeat until an ambulance arrives.

HEART ATTACK

Symptoms of a heart attack may include any of the following:

- Uncomfortable pressure, fullness or squeezing pain in the center of the chest.
- Expanded pain in the upper abdomen.
- Shortness of breath.
- Pain or numbness in either arms, shoulders, neck, jaw or teeth.
- Dizziness or fainting.
- Nausea and sweating.

If you or someone else may be having a heart attack - follow these steps immediately:

- **DIAL 911**
- **Chew and swallow Aspirin (unless you are allergic/not allowed to)**
- **Take Nitroglycerin (only if prescribed)**
- **Begin CPR if the person is unconscious**

FIRST AID FOR BURNS & CHOKING

BURNS

For minor 1st and 2nd degree burns smaller than 3" in diameter: Cool the Burn. Run cool water over the burned area for 5 minutes, or until the pain diminishes. Never put ice on a burn!

Bandage the burn with sterile gauze:

It is important to use loosely wrapped gauze. This will avoid pressure and the bandage protects blisters. NEVER put lotions, vaseline, ointments or butter on burn. Do not break any blisters, which can cause infection.

Take Aspirin, Ibuprofen, Naproxen or Acetaminophen to relieve pain:

Minor burns usually heal with these basic treatments. Be aware for signs of infection which may include: increased pain, redness, fever, swelling or oozing. If symptoms develop, seek medical help. Avoid tanning the burned area for at least a year. Protect the area with sunscreen outdoors. Avoid giving aspirin to children.

For 3rd degree burns/all major burns - DIAL 911

DO NOT run cold water over large severe burns - this can cause shock.

DO NOT remove burnt clothing.

Check for signs of breathing/coughing/movement.

If there are no signs of breathing begin CPR.

Elevate burned areas above heart level, if possible.

Cover the burn(s) with cool, sterile, moist bandages, towels or cloth.

CHOKING

Most people clutch at their throats when choking, an obvious symbol for help. However, if a person isn't giving that signal, be alert for these indications. Inability to talk, difficulty breathing or noisy breathing, inability to cough forcefully, skin/lips/nails turning blue, loss of consciousness.

The Red Cross recommends a "five-and-five" method for first aid: First give five blows between the person's shoulders with the heel of your hand. Second, perform the Heimlich maneuver (abdominal thrusts) five times. Alternate between five back blows and five abdominal thrusts until the blockage is dislodged.

FIRST AID FOR INSECT BITES/ANAPHYLAXIS & POISON SAFETY

INSECT BITES/ANAPHYLAXIS

Anaphylaxis is a severe allergic reaction from insect bites (latex, food and drug allergies can also cause Anaphylaxis). Typical symptoms include hives, the swelling of lips or eyes, swollen throat, drop in blood pressure, light headedness, confusion, nausea or diarrhea. If someone is having an allergic reaction from an insect bite with these symptoms:

CALL 911.

Administer emergency prescription medication. See if the person is carrying special emergency allergy medicine and give it to them according to the directions.

Loosen tight clothing.

Lay the person down. The person should lay down on their back with feet elevated. Turn them on their side if they are vomiting or bleeding from their mouth to prevent them from choking.

If they are not breathing - administer CPR. Most insect bite reactions are mild and cause no allergic reaction. If stung by a bee, use a straight edged object, like a credit card, to scrape away the stinger. Don't use tweezers - they can pinch more venom out of the stinger. Apply an ice pack to the area and take an over the counter pain reliever.

POISON PREVENTION

Teach your children about poison and how it can look like a food or drink. They should always ask an adult before eating or drinking anything. Have them learn the poison control phone number: 1-800-222-1222 and keep it programmed or posted near all your phones. Here are some prevention tips.

Lock up your poisons and medications. Keep them out of the reach of children, lock them up if possible. Make sure your children understand that medicine is not candy.

Follow directions carefully. Read your labels. Be sure to use and store all poisons and medications properly according to recommendations.

Keep your pets safe from household chemicals, too. Don't allow pets near areas that have just been cleaned with chemicals, such as freshly mopped floors or bleached bathtubs and sinks. Clean up any antifreeze/coolant spills. Pets like the flavor but they can die if they ingest it. Store poisonous foods or plants in areas that your pets cannot access. Call your local emergency veterinary hospital if you believe your pet has been poisoned.

Safety Tips for Parents & For Kids

PARENTS:

- Teach your kids that an emergency is when you need help from a doctor, a police officer or a firefighter.
- Designate a safe place by your house that a child can go to if they need help right away.
- Have your kids memorize your address and phone numbers. They should also know your full name and where you work.

KIDS:

FIRE SAFETY

- If you or someone else is on fire - remember to STOP, DROP and ROLL. Wrap a blanket on the person to help put out the fire.
- If there is a fire, leave the house as fast as you can! Crawl on the floor to avoid smoke and if the door is hot, don't open it - find another way out.
- Learn all the fire exits in your house. Assign a safe place outside for everyone to meet in case of a fire emergency.

HOME ALONE

- Never tell anyone that you are home alone.
- If someone calls and ask for your mom and dad, tell them "They cannot come to the phone right now, can you please call back later?"
- Do not answer the door, unless it is someone that you know your parents have okay'd them to come over.
