BOB'S PERFORMANCE CENTER

Do You Have One Of These?

Get your RV
ready for
spring!

Come Visit the
Largest RV Accessories
and Parts Showroom
in Carson Valley!

I trust Bob's Performance Center with all of my RV repair work. They recently installed a Banks Powerpack system and the additional power my motorhome has now is amazing! They also installed a track bar and the stabilization on my motorhome has increased dramatically. My gas mileage has improved from 8 to 10 miles per gallon and I do not have any fear letting my wife drive because the motorhome no longer has any tailwig when a semi truck passes on the other side of the highway.
— Bob Kortan, retired former owner of BJS RV Service

FIRESTONE AIRBAGS

History of Reno

Reno was settled in the 1850s as pioneers arrived to raise crops and mine gold and silver. As rail lines were constructed in 1863 the area began to boom and Reno was officially founded in 1868 and named in honor of Major General Jesse Lee Reno, an officer of the Civil War. In 1871 Reno was selected as the county seat of Washoe County and the community quickly became a center for agriculture, mining and warehousing. By 1960 its population had reached 84,743 and the area continued to develop. Reno is now widely recognized for its entertainment and its proximity to Lake Tahoe and the Sierra Nevada Mountain Range has made the area popular for recreational enthusiasts. Today Reno is home to approximately 219,636 residents.

RENO STATISTICS

Approximate Population	219,636	Average High Temperature	66.8 °F

History of Sparks

Originally home to Washoe and Paiute tribes, the Sparks area was first recognized as East Reno, New Wadsworth and Harriman as it was established in 1904 as a railroad community and incorporated the following year. Sparks was renamed in honor of local landowner Governor John T. Sparks and growth was gradual until the economic boom of the 1950s where its population reached 8,203. As industry began to diversify in the 1970s, manufacturing and warehousing began to replace nearby pastures and the community grew dramatically to 24,187 residents. Sparks is now the fourth most populous city in Nevada and boasts a variety of restaurants, entertainment and recreational opportunities. Today Sparks is home to approximately 89,346 residents.

SPARKS STATISTICS

Approximate Population	89,346	Average High Temperature	68.2 °F
Land Area	23.9 sq. mi.	Average Low Temperature	36.7 °F
Elevation	4,413 ft.	Average Growing Season	96 days
Average Annual Snowfall	5.5 in.	Average Days of Sunshine	300+
Average Annual Precipitation	7.92 in.	<i>*Statistics are approximate.</i>	

****Did you know that John Ascuaga's Nugget Casino was home to the performing elephant Bertha and her showgirl act for over 35 years, living to the age of 48?***

Boating Safety

Operating Watercraft

Follow these guidelines to help prevent and prepare for capsizing, swamping, or someone falling overboard.

- Make sure that you and your passengers are wearing life jackets while the boat is moving.
- Attach the ignition safety lanyard to your wrist, clothes, or life jacket.
- Don't allow anyone to sit on the gunwale, bow, seat backs, motor cover, or areas not designed for seating. Also, don't let anyone sit on pedestal seats when craft is not in idle.
- Don't overload your boat. Balance the load of passengers and gear stored on-board.
- Keep your center of gravity low by not allowing people to stand up or move around while craft is in motion.
- In small boats, don't allow anyone to lean beyond the gunwale.
- Turn boat at slow rates of speed.
- Secure the anchor line to the bow, never to the stern.
- Don't risk operating water craft in rough conditions or bad weather.

Boating Safety

Know Your Craft

Who May Operate a Motorboat (Other Than a Personal Watercraft)

For engines 25 horsepower or less:

Those under age 12 may operate without restrictions.

For engines over 25 horsepower through 75 horsepower:

Those under age 12 must have someone 21 years of age or older on board within reach of the controls.

For engines over 75 horsepower:

No children under age 12 may operate, even with an adult on board.

Other restrictions apply to boat operators 12 to 17 years old:

Operators from 12 to 17 years of age may operate engines of 25 horsepower or lower with no restrictions.

For engines over 25 horsepower:

Operators 12 to 17 years of age must have:

A watercraft operator's permit, or someone age 21 years or older on board within reach of the controls.

Boating Safety

Flotation Devices

Offshore Life Jackets - Type 1:

For rough or remote waters where rescue may take awhile. Provide the most buoyancy, excellent for flotation, turns most unconscious persons face up in the water.

Near-Shore Vests - Type 2:

Good for calm waters when quick assistance or rescue is likely. Turns some unconscious wearers face up in the water, but not as efficiently as offshore life jackets.

Flotation Aids - Type 3:

Vests or full-sleeved jackets good for calm waters when quick assistance is likely. Not for rough waters. They will not turn most unconscious persons face up. Used for sports, such as water-skiing. Some inflate in water.

Unwearable / Throwable Devices - Type 4:

Cushions and ring buoys designed to be thrown to someone in trouble. Type 4 is not designed to be worn. Not for rough waters - not for anyone unable to hold on to it.

Special Use - Type 5:

Vests, hybrids/others designed for specific activities, for example windsurfing, kayaking, water-skiing. Some Type 5 devices inflate when entering the water. To be acceptable, Type 5 must be used in compliance with their label instructions.

All watercraft must have at least one Coast Guard Approved Type 1, 2, 3 or 5 flotation device that is the proper size for each person on board or being towed.

All devices must be in good condition and easily accessible.

Children under age 10 must wear a device when on board a boat that is underway unless: in an enclosed cabin or below deck or on an anchored boat that is being used for swimming or diving or passenger craft with a licensed captain.

Along with the above at least one approved Type 4 must be on board boats 16 ft. or longer (except canoes and kayaks) and immediately available.

A Coast Guard approved Type 5 device may be substituted for any other Coast Guard approved device if it meets the same requirements and is noted on the label.

Anyone riding a jet ski or other Personal Water Craft must wear an approved -non inflating flotation device, as well as anyone being towed by a water craft.

Hunting Safety

All hunters should consider taking an advanced hunter education class to learn the latest hunting techniques along with tips on coming home alive.

Here are five suggestions for a safe and successful hunting experience:

1. Get a detailed map of the area you are hunting, review it before you leave, and carry it with you in the field.
2. Carry a compass and know how to use it. Decide ahead of time the direction to head for if you get lost or disoriented.
3. Weather can change quickly in Minnesota, so hunters should carry a simple survival kit and be prepared for an unexpected overnight stay in the field. The survival kit should contain a rope, a knife, water, waterproof matches, an emergency shelter, and first aid supplies.
4. If you are on the water, make sure to wear a personal flotation device (life preserver).
5. Know your hunting partners' physical and emotional limitations, as well as your own, and don't push your partners or yourself beyond those limits.

Bicycle Safety

- Always wear a properly fitting bike helmet as most serious injuries are to the head.
- Be sure your handlebars, seat and wheels fit snugly.
- Keep your bike in good shape by checking and oiling your chain, making sure your brakes work properly and maintaining your tire pressure.
- Always ride with both hands on the handlebars except when doing turn signals.
- When leaving a driveway, curb or alleyway always stop and check for traffic in both directions.
- Cross only at intersections.
- Use the crosswalk to walk your bike across busy intersections and follow the traffic signals.
- Never ride against traffic. Travel in the same direction as the cars.
- Whenever you can, use bike routes and avoid busy streets.
- Don't ride near parked cars as doors can open and cause accidents.
- Obey all traffic signs and traffic lights.
- When biking with friends, ride in a single file.
- Always pass other bikers or pedestrians on the left and say "On your left!" to make your presence known.
- Always use bicycle hand signals to alert traffic of your changing direction.

Retired Veteran, Reno

ATV Safety

- Read the owner's manual and know your vehicle thoroughly.
- Check your vehicle before you ride.
- Wear protective equipment and clothing.
- Don't lend your vehicle to unskilled riders.
- Supervise young or inexperienced riders.
- Never carry a passenger on vehicles meant for one rider.
- Do not operate under the influence of drugs or alcohol.
- Drive at speeds that are appropriate to trail conditions.
- Stay to the right on trails.
- Stay away from thin ice, open water and wetlands
- Know the weather forecast.
- Make sure headlights and taillights work properly.
- Maintain safe distances between other riders.
- Reduce your speed when riding at night.
- Yield to other motor vehicles and trail users.
- Young or beginning riders are encouraged to take a safety training course.

Snowmobile Safety

- Do not consume alcohol or take drugs prior to or during your snowmobile trip. Doing so increases your chances of injury or death.
- Slow down and don't cut to the inside of the trail corners. It's dangerous and illegal.
- If you snowmobile at night, don't override your lights.
- Always use the buddy system. Never ride off alone.
- Drowning is one of the causes of many snowmobile fatalities. Whenever possible, avoid the ice.
- Wear sensible, protective clothing designed for operating a snowmobile.
- Use a full size helmet, goggles, or visor to prevent injuries from twigs, stones, ice chips and other debris.
- Avoid wearing long scarves. They may get caught in moving parts of the snowmobile.
- Know the terrain you are going to ride. If unfamiliar to you, ask someone who has traveled over it before.
- Know the weather forecast, especially the ice and snow conditions.
- Be sure your snowmobile is in top-notch mechanical condition throughout the months of use.
- Familiarize yourself with the snowmobile you are driving. Thoroughly read the manual that accompanies the snowmobile.
- Do not pursue domestic or wild animals. That is not the conduct of a sportsman. Report such violations to the nearest law enforcement officer.

Common Trail Signs

Home Safety

- Keep the outside of your home well-lit. Motion sensors and timers help deter burglars.
- Dead-bolts and peep-holes should be placed on all outside doors.
- Windows and sliding glass doors should have locks and be in good working order.
- Keep your garage door closed.
- Use an engraver to mark computers, cameras, stereos, TV's, tools, yard equipment, etc.
- Never leave valuables, expensive jewelry, or large amounts of cash at home. If you must, keep a list of your valuables with serial numbers to assist in insurance claims.
- Keep your car locked at all times and store all valuables out of sight.
- Guns should always be stored unloaded and with a gunlock.
- Become part of a neighborhood watch or program that is similar.
- Be suspicious of unusual people or vehicles in your neighborhood. Document the date, time, description and license plate number to give to law enforcement if needed.
- When on vacation, do not advertise your absence. Stop mail and newspaper delivery. Have a trusted friend or neighbor to give the impression you are home by stopping by to take out trash, shovel snow, mow the lawn, etc.

Emergency Planning

ESCAPE ROUTES

Everyone in your family should know the best ways to exit the house in case of a disaster. Teach your young children how to open sliding doors, windows and other exits. Designate a meeting place where the family can gather after escaping from the house.

FLASHLIGHTS

The whole family needs to know where to find flashlights. Periodically check the batteries.

FULLY CHARGED CELL PHONES

All family members should keep their cell phones charged. Make a habit of charging them, while everyone is asleep. Cell phones can be lifesavers in emergencies.

LIST OF VALUABLES

Keep this document listing your possessions (and if possible, a video of your home interior) in a fireproof safe, or in a safe deposit box at a bank.

COMMUNITY EMERGENCY PLANS

Familiarize yourself with community evacuation plans and neighborhood escape routes. Post a copy of them in a highly visible place in your home.

THUNDERSTORM/TORNADO

- Remove dead branches from trees beforehand to avoid injury or damage.
- After seeing lightning, if you hear thunder in less than 30 seconds, it is recommended that you stay inside for 30 minutes after the thunder has ceased.
- The inside of a car is safer than the outside, as a lightning strike will simply pass through the car as long as you aren't in contact with any metal.
- Unplug all major appliances, as a power surge can cause serious damage.
- Avoid all tall structures and elevated areas as well as large amounts of metal.

FIRES

- Make sure that every level of your house has a smoke detector, and be sure to test them once a month. Have the family plan an emergency exit route.
- Always keep track of any stoves or high-temperature/high-voltage appliances that are running. Be sure to never leave any cooking unattended.
- Keep lighters and matches away from children.
- If a burn occurs, soak the skin in cool water. If the skin blisters, seek medical assistance.

⊕ Emergency First-Aid Tips ⊕

FIRST AID FOR CPR & HEART ATTACK

CPR

CPR is to be administered when a person is not breathing or has no pulse. Be quick to act by remembering the A,B,C's: Airway, Breathing & Circulation.

Airway:

Place the person on a firm surface, on their back. Kneel next to the person's neck and shoulders. Open the person's airway by tilting back the head and lifting the chin.

Breathing:

With the head tilted and chin lifted, pinch the nostrils shut and cover the person's mouth with yours. Give two slow breaths.

Circulation:

Find the hand position on the center of the breastbone. Place the heel of your hand on that position, with your other hand on top of the first hand. Use your upper body weight to push down. Give two compressions per second. Compress the chest at a rate equal to 100/minute. Perform 30 compressions at this rate. Repeat until an ambulance arrives.

HEART ATTACK

Symptoms of a heart attack may include any of the following:

- Uncomfortable pressure, fullness or squeezing pain in the center of the chest.
- Expanded pain in the upper abdomen.
- Shortness of breath.
- Pain or numbness in either arms, shoulders, neck, jaw or teeth.
- Dizziness or fainting.
- Nausea and sweating.

If you or someone else may be having a heart attack - follow these steps immediately:

- **DIAL 911**
- **Chew and swallow Aspirin (unless you are allergic/not allowed to)**
- **Take Nitroglycerin (only if prescribed)**
- **Begin CPR if the person is unconscious**

IN AN EMERGENCY, DIAL 911

FIRST AID FOR BURNS & CHOKING

BURNS

For minor 1st and 2nd degree burns smaller than 3" in diameter: Cool the Burn. Run cool water over the burned area for 5 minutes, or until the pain diminishes. Never put ice on a burn!

Bandage the burn with sterile gauze:

It is important to use loosely wrapped gauze. This will avoid pressure and the bandage protects blisters. NEVER put lotions, vaseline, ointments or butter on burn. Do not break any blisters, which can cause infection.

Take Aspirin, Ibuprofen, Naproxen or Acetaminophen to relieve pain:

Minor burns usually heal with these basic treatments. Be aware for signs of infection which may include: increased pain, redness, fever, swelling or oozing. If symptoms develop, seek medical help. Avoid tanning the burned area for at least a year. Protect the area with sunscreen outdoors. Avoid giving aspirin to children.

For 3rd degree burns/all major burns - DIAL 911

DO NOT run cold water over large severe burns - this can cause shock.

DO NOT remove burnt clothing.

Check for signs of breathing/coughing/movement.

If there are no signs of breathing begin CPR.

Elevate burned areas above heart level, if possible.

Cover the burn(s) with cool, sterile, moist bandages, towels or cloth.

CHOKING

Most people clutch at their throats when choking, an obvious symbol for help. However, if a person isn't giving that signal, be alert for these indications. Inability to talk, difficulty breathing or noisy breathing, inability to cough forcefully, skin/lips/nails turning blue, loss of consciousness.

The Red Cross recommends a "five-and-five" method for first aid: First give five blows between the person's shoulders with the heel of your hand. Second, perform the Heimlich maneuver (abdominal thrusts) five times. Alternate between five back blows and five abdominal thrusts until the blockage is dislodged.

IN AN EMERGENCY, DIAL 911

FIRST AID FOR INSECT BITES/ANAPHYLAXIS & POISON SAFETY

INSECT BITES/ANAPHYLAXIS

Anaphylaxis is a severe allergic reaction from insect bites (latex, food and drug allergies can also cause Anaphylaxis). Typical symptoms include hives, the swelling of lips or eyes, swollen throat, drop in blood pressure, light headedness, confusion, nausea or diarrhea. If someone is having an allergic reaction from an insect bite with these symptoms:

CALL 911.

Administer emergency prescription medication. See if the person is carrying special emergency allergy medicine and give it to them according to the directions.

Loosen tight clothing.

Lay the person down. The person should lay down on their back with feet elevated. Turn them on their side if they are vomiting or bleeding from their mouth to prevent them from choking.

If they are not breathing - administer CPR. Most insect bite reactions are mild and cause no allergic reaction. If stung by a bee, use a straight edged object, like a credit card, to scrape away the stinger. Don't use tweezers - they can pinch more venom out of the stinger. Apply an ice pack to the area and take an over the counter pain reliever.

POISON PREVENTION

Teach your children about poison and how it can look like a food or drink. They should always ask an adult before eating or drinking anything. Have them learn the poison control phone number: 1-800-222-1222 and keep it programmed or posted near all your phones. Here are some prevention tips.

Lock up your poisons and medications. Keep them out of the reach of children, lock them up if possible. Make sure your children understand that medicine is not candy.

Follow directions carefully. Read your labels. Be sure to use and store all poisons and medications properly according to recommendations.

Keep your pets safe from household chemicals, too. Don't allow pets near areas that have just been cleaned with chemicals, such as freshly mopped floors or bleached bathtubs and sinks. Clean up any antifreeze/coolant spills. Pets like the flavor but they can die if they ingest it. Store poisonous foods or plants in areas that your pets cannot access. Call your local emergency veterinary hospital if you believe your pet has been poisoned.

IN AN EMERGENCY, DIAL 911

Safety Tips for Parents & For Kids

PARENTS:

- Teach your kids that an emergency is when you need help from a doctor, a police officer or a firefighter.
- Designate a safe place by your house that a child can go to if they need help right away.
- Have your kids memorize your address and phone numbers. They should also know your full name and where you work.

KIDS:

FIRE SAFETY

- If you or someone else is on fire - remember to STOP, DROP and ROLL. Wrap a blanket on the person to help put out the fire.
- If there is a fire, leave the house as fast as you can! Crawl on the floor to avoid smoke and if the door is hot, don't open it - find another way out.
- Learn all the fire exits in your house. Assign a safe place outside for everyone to meet in case of a fire emergency.

HOME ALONE

- Never tell anyone that you are home alone.
- If someone calls and ask for your mom and dad, tell them "They cannot come to the phone right now, can you please call back later?"
- Do not answer the door, unless it is someone that you know your parents have okay'd them to come over.
