Rusk County History (Ladysmith, County Seat)

In 1884 Rusk County territory was opened for settlement as many pioneers began arriving to work in the logging industry. Nearby rivers were used to transport heavy timber to nearby mills and those that were not part of the logging industry were involved in agriculture. The Soo Line railroad arrived the same year and many homes and businesses were built as a result. Originally known as Gates County, Rusk County was renamed in 1901 after Jeremiah Rusk, a civil war hero, congressman, governor and US Secretary of Agriculture. Ladysmith was then chosen as the county seat. As the area developed, Rusk County has been a haven for recreation enthusiasts. Visitors can enjoy canoeing, boating, fishing, whitewater rafting, horseback riding and skiing. Many golf courses and state parks are located within the county, offering numerous outdoor activities. To-day Rusk County is home to approximately 14,389 residents.

BRUCE

Bruce was established in 1884 and later incorporated as a village in 1901. The lumber industry and agriculture became very prosperous for Bruce and attracted settlers to the area. Today Bruce is home to approximately 682 residents.

CONRATH

Conrath was named after the Charles, Frank, Felix, Joe and John Conrath brothers, who established a logging and sawmill business in the area. The community was originally named Main Creek but was later renamed in 1905 when it was incorporated. Today Conrath is home to approximately 85 residents.

Rusk County Communities

GLEN FLORA

Glen Flora was named after the Roman Goddess Flora, the Goddess of plants and vegetation. Glen Flora was originally named Miller's Siding but was renamed after the post office was established in 1887. Early settlers arrived to the area in 1885. Within a short time three sawmills were in operation. Populations increased with the arrival of railroads and the lumber industry to the area. Today Glen Flora is home to approximately 81 residents.

HAWKINS

Hawkins was named in honor of M.P. Hawkins, a secretary of the Soo Line Railroad. Early settlers were loggers and were attracted to the abundance of large white pines in the area. Eventually, Hawkins became one of the largest producers of timber in Rusk County. Today Hawkins is home to approximately 167 residents.

LADYSMITH (COUNTY SEAT)

Ladysmith was established where the Soo Line Railroad and the Flambeau River crossed. A logger and lumber entrepreneur who greatly influenced the community by the name of Robert Corbett, originally named the territory "Corbett" then "Warner" in 1891. Many settlers arrived to the region in search of work in the lumber industry and the area began to boom. Those that were not involved in logging were masons, carpenters or farmers; and hotels and businesses were quickly built to accommodate their growing needs. In 1900, Warner was renamed Ladysmith as a tribute to the bride of Charles R. Smith, who owned the Menasha Wooden Company. In 1902, the nearby communities Bruce and Tony contested with Ladysmith for the county seat and there were many town rivalries until Ladysmith was officially declared. Soon, Ladysmith was known as a paper and lumbering town, but by 1915 most of the timber had been exhausted. Residents focused on agriculture as many raised cattle for the dairy industry and later tourism. Today Ladysmith is home to approximately 3,339 residents.

SHELDON

Sheldon began as a logging town with most of its area owned by lumber companies. The community was originally named Fern for the abundance of Fern to the area, but was renamed Sheldon in 1906 after an important Wisconsin Central Railroad official. Sheldon was incorporated that same year. After the decline of the lumber industry in the early 1900s, the land in Sheldon was sold and was bought up by immigrants and new settlers to the area. Sheldon was later platted in 1906 and populations increased with the rise of agriculture. Today Sheldon is home to approximately 218 residents.

Rusk County Communities

TONY

Tony was named in honor of Anthony Hem, manager of the John Hem Company. It was originally named Deer Tail but was renamed as the town's population grew towards the end of the 1800s. Populations increased in the area with the abundance of jobs from sawmills and other lumber and agricultural industries. Today Tony is home to approximately 89 residents.

8 Rusk & Sawyer Counties - Resident Guide

Sawyer County History (Hayward, County Seat)

Fur traders were among the first settlers in Sawyer County, trading with Chippewa Indians for pelts. The first trading post, Codette's, was established south of Hayward. Due to the plentiful timber, lumber barons were attracted to the area. By the 1870s, A.J. Hayward headed the North Wisconsin Lumber Company which harvested the white pines in Sawyer County. The settlement of Hayward was officially established in 1881, becoming part of Sawyer County in 1883 as the county seat. As the railroad arrived, the lumber and milling business began to boom and tourism grew. When timber resources were exhausted around 1900, tourism became the area's most important industry. Over 200 lakes are nestled within Sawyer County, attracting many outdoor recreational enthusiasts. Fishing camps, cabins, resorts and clubs make up its tourism industry. Today Sawyer County is home to approximately 17,117 residents.

COUDERAY

Couderay is named after the Lac Courte O'Reilles Indian Reservation which is located to the north of the town. Early industry included logging and agriculture. Populations increased with the arrival of railroads and businesses to the area. Today Couderay is home to approximately 549 residents.

EXELAND

Exeland is named after railroad tracks that cross paths located within the town. Early industry included logging, farming and manufacturing. Populations increased steadily with the arrival of the logging industry railroads and agriculture to the area. Today Exeland is home to approximately 203 residents.

HAYWARD (COUNTY SEAT)

Settlement of the Hayward area began in the 1870s as timber was plentiful. Upon arrival, A.J. Hayward viewed the area as a prime location for a lumber mill. He established the North Wisconsin Lumber Company along the Namekagon River. Dams were built to power the mills and the lumber was used for local businesses and homes, or shipped via the riverways. The community grew around the logging industry and the railroad arrived in 1881, enabling smoother transpor

10 Rusk & Sawyer Counties - Resident Guide

Sawyer County Communities

tation of timber. Hayward was named after its founder and became the county seat in 1883. The first schoolhouse soon followed. As timber resources began to dwindle, logging camps disappeared in the early 1900s. Hayward's industry became focused on tourism and resorts were built to accommodate the needs of vacationers from Wisconsin and Illinois. Hayward is now widely recognized for its recreational appeal with many lakes, trails, camps, and activities to enjoy. Although the logging industry has since declined, residents still celebrate its rich history with the annual World Lumberjack Championships. Today Hayward is home to approximately 3,302 residents.

RADISSON

Radisson was named in honor of Pierre-Esprit Radisson, a French fur trader and explorer who discovered the Hudson Bay. Early industry included logging and agriculture. Populations increased with the arrival of railroads to the area. Today Radisson is home to approximately 520 residents.

WINTER

Winter was named in honor of John Winter, an Omaha Railroad official. It was originally established as a logging community and was named LeBoef. Logging made up most of the industry in Winter until its decline in the early 1900s when agriculture became increasingly profitable. Today Winter is home to approximately 1,132 residents.

Boating Safety

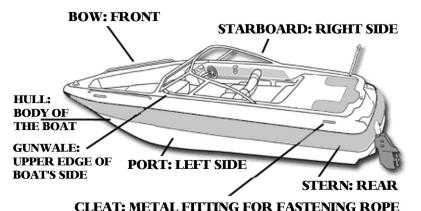

Operating Watercraft

Follow these guidelines to help prevent and prepare for capsizing, swamping, or someone falling overboard.

- Make sure that you and your passengers are wearing life jackets while the boat is moving.
- Attach the ignition safety lanyard to your wrist, clothes, or life jacket.
- Don't allow anyone to sit on the gunwale, bow, seat backs, motor cover, or areas not designed for seating. Also, don't let anyone sit on pedestal seats when craft is not in idle.
- Don't overload your boat. Balance the load of passengers and gear stored on-board.
- Keep your center of gravity low by not allowing people to stand up or move around while craft is in motion.
- In small boats, don't allow anyone to lean beyond the gunwale.
- Turn boat at slow rates of speed.
- Secure the anchor line to the bow, never to the stern.
- Don't risk operating water craft in rough conditions or bad weather.

Boating Safety

Know Your Craft

BEAM: MAXIMUM WIDTH OF BOAT

COME ABOARD BOAT. **DRAFT: DEPTH OF WATER NEEDED**

KEEL: CENTERLINE OF BOAT OR EXTENSION OF HULL (INCREASES STABILITY)

Who May Operate a Motorboat (Other Than a Personal Watercraft)

For engines 25 horsepower or less:

Those under age 12 may operate without restrictions. For engines over 25 horsepower through 75 horsepower:

Those under age 12 must have someone 21 years of age or older on board within reach of the controls.

For engines over 75 horsepower:

No children under age 12 may operate, even with an adult on board.

24 Rusk & Sawyer Counties - Resident Guide

Other restrictions apply to boat operators 12 to 17 years old:

Operators from 12 to 17 years of age may operate engines of 25 horsepower or lower with no restrictions. For engines over 25 horsepower:

Operators 12 to 17 years of age must have: A watercraft operator's permit, or someone age21 years or older old on board within reach of the controls.

Boating Safety

Flotation Devices

Offshore Life Jackets - Type 1:

For rough or remote waters where rescue may take awhile. Provide the most buoyancy, excellent for flotation, turns most unconscious persons face up in the water.

Good for calm waters when guick assistance or rescue is likely. Turns some unconscious

wearers face up in the water, but not as efficiently as offshore life jackets.

Near-Shore Vests - Type 2:

Flotation Aids - Type 3:

Vests or full-sleeved jackets good for calm waters when guick assistance is likely. Not for rough waters. They will not turn most unconscious persons face up. Used for sports, such as water-skiing. Some inflate in water.

Unwearable / Throwable Devices - Type 4:

Cushions and ring buoys designed to be thrown to someone in trouble. Type 4 is not designed to be worn. Not for rough waters - not for anyone unable to hold on to it.

Special Use - Type 5:

Vests, hybrids/others designed for specific activities, for example windsurfing, kayaking, water-skiing. Some Type 5 devices inflate when entering the water. To be acceptable, Type 5 must be used in compliance with their label instructions.

All watercraft must have at least one Coast Guard Approved Type 1, 2, 3 or 5 flotation device that is the proper size for each person on board or being towed.

All devices must be in good condition and easily accessible.

Children under age 10 must wear a device when on board a boat that is underway unless:

in an enclosed cabin or below deck or on an anchored boat that is being used for swimming or diving or passenger craft with a licensed captain.

Along with the above at least one approved Type 4 must be on board boats 16 ft. or longer (except canoes and kayaks) and immediately available.

A Coast Guard approved Type 5 device may be substituted for any other Coast Guard approved device if it meets the same requirements and is noted on the label.

Anyone riding a jet ski or other Personal Water Craft must wear an approved -non inflating flotation device, as well as anyone being towed by a water craft.

LOCALLY

...and support the community **you live in!**

the community

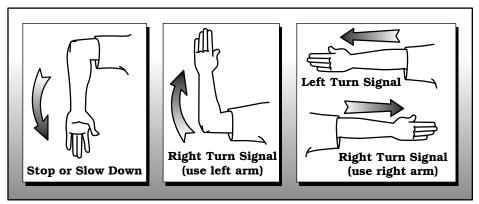

ATV Safety

- Read the owner's manual and know your vehicle thoroughly.
- Check your vehicle before you ride.
- Wear protective equipment and clothing.
- Don't lend your vehicle to unskilled riders.
- Supervise young or inexperienced riders.
- Never carry a passenger on vehicles meant for one rider.
- Do not operate under the influence of drugs or alcohol.
- Drive at speeds that are appropriate to trail conditions.
- Stay to the right on trails.
- Stay away from thin ice, open water and wetlands
- Know the weather forecast.
- Make sure headlights and taillights work properly.
- Maintain safe distances between other riders.
- Reduce your speed when riding at night.
- Yield to other motor vehicles and trail users.
- Young or beginning riders are encouraged to take a safety training course.

Bicycle Safety

- Always wear a properly fitting bike helmet as most serious injuries are to the head.
- Be sure your handlebars, seat and wheels fit snugly.
- Keep your bike in good shape by checking and oiling your chain, making sure your brakes work properly and maintaining your tire pressure.
- Always ride with both hands on the handlebars except when doing turn signals.
- When leaving a driveway, curb or alleyway always stop and check for traffic in both directions.
- Cross only at intersections.
- Use the crosswalk to walk your bike across busy intersections and follow the traffic signals.
- Never ride against traffic. Travel in the same direction as the cars.
- Whenever you can, use bike routes and avoid busy streets.
- Don't ride near parked cars as doors can open and cause accidents.
- Obey all traffic signs and traffic lights.
- When biking with friends, ride in a single file.
- Always pass other bikers or pedestrians on the left and say "On your left!" to make your presence known.
- Always use bicycle hand signals to alert traffic of your changing direction.

Snowmobile Safety

Do not consume alcohol or take drugs prior to or during your snowmobile trip. Doing so increases your chances of injury or death.

Slow down and don't cut to the inside of the trail corners. It's dangerous and illegal.

If you snowmobile at night, don't override your lights.

Always use the buddy system. Never ride off alone.

Drowning is one of the causes of many snowmobile fatalities. Whenever possible, avoid the ice.

Wear sensible, protective clothing designed for operating a snowmobile.

Use a full size helmet, goggles, or visor to prevent injuries from twigs, stones, ice chips and other debris.

Avoid wearing long scarves. They may get caught in moving parts of the snowmobile.

Know the terrain you are going to ride. If unfamiliar to you, ask someone who has traveled over it before.

Know the weather forecast, especially the ice and snow conditions.

Be sure your snowmobile is in top-notch mechanical condition throughout the months of use.

Familiarize yourself with the snowmobile you are driving. Thoroughly read the manual that accompanies the snowmobile.

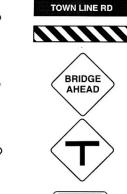

Do not pursue domestic or wild animals. That is not the conduct of a sportsman. Report such violations to the nearest law enforcement officer.

Common Trail Signs

STOP

ONE

WAY

STEEP

HILL

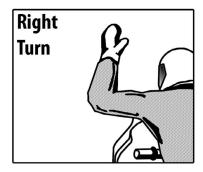

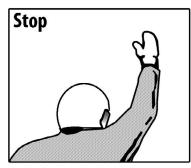

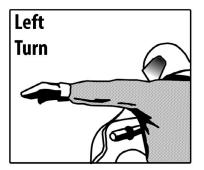

Snowmobile Safety

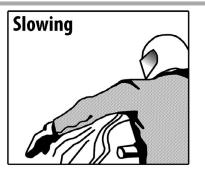

Communication is an essential part of safe riding. Hand signals are a practical way to communicate between other riders and traffic.

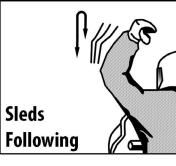

Be sure to give easy to see and clear hand signals when snowmobiling. Hand signals should never be subtle, but always deliberate.

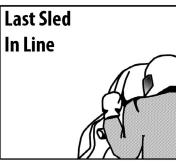

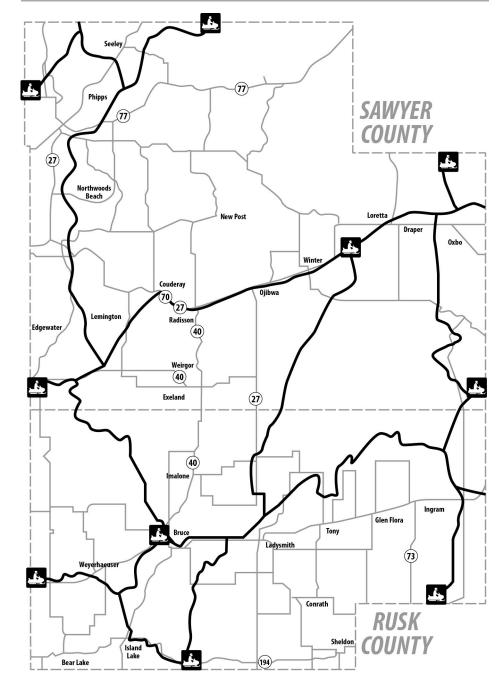

Snowmobile Trails

Home Safety

- Keep the outside of your home well-lit. Motion sensors and timers help deter burglars.
- · Dead-bolts and peep-holes should be placed on all outside doors.
- Windows and sliding glass doors should have locks and be in good working order.
- Keep your garage door closed.
- Use an engraver to mark computers, cameras, stereos, TV's, tools, yard equipment, etc.
- Never leave valuables, expensive jewelry, or large amounts of cash at home. If you must, keep a list of your valuables with serial numbers to assist in insurance claims.
- Keep your car locked at all times and store all valuables out of sight.
- Guns should always be stored unloaded and with a gunlock.
- Become part of a neighborhood watch or program that is similar.
- Be suspicious of unusual people or vehicles in your neighborhood. Document the date, time, description and license plate number to give to law enforcement if needed.
- When on vacation, do not advertise your absence. Stop mail and newspaper delivery. Have a trusted friend or neighbor to give the impression you are home by stopping by to take out trash, shovel snow, mow the lawn, etc.

Carbon Monoxide Safety

PREVENTION

- Install carbon monoxide detectors near every bedroom, gas appliance and in your RV, camper or motor home and test them monthly.
- Have flues, chimneys and all fuel-burning appliances inspected by a professional annually.
- Make sure fireplaces, wood stoves, dryers, furnaces and water heaters are properly vented to the outside.
- Only burn clean and untreated wood.
- Never idle your car or gas powered vehicle in the garage, with or without the garage door open.
- Toxic fumes build up quickly and can easily contaminate your home.
- Never use gas-powered engines like weed trimmers, snow blowers, chain saws, lawnmowers or portable generators in enclosed areas.
- Never use a charcoal grill indoors or in any closed area.
- Never use a gas oven to heat your home.
- Never sleep in a room or area heated with a gas or kerosene space heater that does not have proper ventilation.

SYMPTOMS

- Headaches, severe fatigue, vomiting, nausea, muscle and joint pain, dizziness, tingling, vertigo
- Attention and multi-tasking problems, short-term memory problems, word-finding problems
- Irritability, temper, loss of interest, sleep disturbance, anxiety, lack of motivation
- Eating and swallowing difficulties, vision problems, lack of muscular coordination, speaking difficulty, ringing in the ears
- Seizures, tremors, balancing problems, shortness of breath

Carbon monoxide poisoning is easily confused with flu-like symptoms. Serious longterm health risks or death can result if warning signs are ignored. Carbon monoxide can affect you for days, weeks, months or years. High levels of carbon monoxide can be fatal within minutes.

TREATMENT

- Immediately take the victim out to fresh air.
- If the victim cannot be removed, open every window and door.
- All appliances should be turned off.
- Take the victim to an emergency room as quickly as fast as possible, or call 911.

32 Rusk & Sawyer Counties - Resident Guide

Emergency Planning

ESCAPE ROUTES

Everyone in your family should know the best ways to exit the house in case of a disaster. Teach your young children how to open sliding doors, windows and other exits. Designate a meeting place where the family can gather after escaping from the house.

FLASHLIGHTS

The whole family needs to know where to find flashlights. Periodically check the batteries.

FULLY CHARGED CELL PHONES

All family members should keep their cell phones charged. Make a habit of charging them, while everyone is asleep. Cell phones can be lifesavers in emergencies.

LIST OF VALUABLES

Keep this document listing your possessions (and if possible, a video of your home interior) in a fireproof safe, or in a safe deposit box at a bank.

COMMUNITY EMERGENCY PLANS

Familiarize yourself with community evacuation plans and neighborhood escape routes. Post a copy of them in a highly visible place in your home.

THUNDERSTORM/TORNADO

- Remove dead branches from trees beforehand to avoid injury or damage.
- After seeing lightning, if you hear thunder in less than 30 seconds, it is recommended that you stay inside for 30 minutes after the thunder has ceased.
- The inside of a car is safer than the outside, as a lightning strike will simply pass through the car as long as you aren't in contact with any metal.
- Unplug all major appliances, as a power surge can cause serious damage.
- Avoid all tall structures and elevated areas as well as large
 amounts of metal.

FIRES

- Make sure that every level of your house has a smoke detector, and be sure to test them once a month. Have the family plan an emergency exit route.
- Always keep track of any stoves or high-temperature/ high-voltage appliances that are running. Be sure to never leave any cooking unattended.
- Keep lighters and matches away from children.
- If a burn occurs, soak the skin in cool water. If the skin blisters, seek medical assistance.

• Emergency First-Aid Tips

FIRST AID FOR CPR & HEART ATTACK

CPR

CPR is to be administered when a person is not breathing or has no pulse. Be quick to act by remembering the A,B,C's: Airway, Breathing & Circulation.

Airway:

Place the person on a firm surface, on their back. Kneel next to the person's neck and shoulders. Open the person's airway by tilting back the head and lifting the chin.

Breathing:

With the head tilted and chin lifted, pinch the nostrils shut and cover the person's mouth with yours. Give two slow breaths.

Circulation:

Find the hand position on the center of the breastbone. Place the heel of your hand on that position, with your other hand on top of the first hand. Use your upper body weight to push down. Give two compressions per second. Compress the chest at a rate equal to 100/minute. Perform 30 compressions at this rate. Repeat until an ambulance arrives.

HEART ATTACK

Symptoms of a heart attack may include any of the following:

- Uncomfortable pressure, fullness or squeezing pain in the center of the chest.
- Expanded pain in the upper abdomen.
- Shortness of breath.
- Pain or numbness in either arms, shoulders, neck, jaw or teeth.
- Dizziness or fainting.
- Nausea and sweating.

If you or someone else may be having a heart attack - follow these steps immediately:

- DIAL 911
- Chew and swallow Aspirin (unless you are allergic/not allowed to)
- Take Nitroglycerin (only if prescribed)
- Begin CPR if the person is unconscious

IN AN EMERGENCY, DIAL 911

• Emergency First-Aid Tips

FIRST AID FOR INSECT BITES/ANAPHYLAXIS & POISON SAFETY INSECT BITES/ANAPHYLAXIS

Anaphylaxis is a severe allergic reaction from insect bites (latex, food and drug allergies can also cause Anaphylaxis). Typical symptoms include hives, the swelling of lips or eyes, swollen throat, drop in blood pressure, light headedness, confusion, nausea or diarrhea. If someone is having an allergic reaction from an insect bite with these symptoms:

CALL 911.

Administer emergency prescription medication. See if the person is carrying special emergency allergy medicine and give it to them according to the directions.

Loosen tight clothing.

Lay the person down. The person should lay down on their back with feet elevated. Turn them on their side if they are vomiting or bleeding from their mouth to prevent them from choking. If they are not breathing - administer CPR. Most insect bite reactions are mild and cause no allergic reaction. If stung by a bee, use a straight edged object, like a credit card, to scrape away the stinger. Don't use tweezers - they can pinch more venom out of the stinger. Apply an ice pack to the area and take an over the counter pain reliever.

POISON PREVENTION

Teach your children about poison and how it can look like a food or drink. They should always ask an adult before eating or drinking anything. Have them learn the poison control phone number: 1-800-222-1222 and keep it programmed or posted near all your phones. Here are some prevention tips.

Lock up your poisons and medications. Keep them out of the reach of children, lock them up if possible. Make sure your children understand that medicine is not candy.

Follow directions carefully. Read your labels. Be sure to use and store all poisons and medications properly according to recommendations.

Keep your pets safe from household chemicals, too. Don't allow pets near areas that have just been cleaned with chemicals, such as freshly mopped floors or bleached bathtubs and sinks. Clean up any antifreeze/coolant spills. Pets like the flavor but they can die if they ingest it. Store poisonous foods or plants in areas that your pets cannot access. Call your local emergency veterinary hospital if you believe your pet has been poisoned.

IN AN EMERGENCY, DIAL 911

Safety Tips for Parents & For Kids

PARENTS:

- Teach your kids that an emergency is when you need help from a doctor, a police officer or a firefighter.
- Designate a safe place by your house that a child can go to if they need help right away.
- Have your kids memorize your address and phone numbers. They should also know your full name and where you work.

KIDS: FIRE SAFETY

- If you or someone else is on fire remember to STOP, DROP and ROLL. Wrap a blanket on the person to help put out the fire.
- If there is a fire, leave the house as fast as you can! Crawl on the floor to avoid smoke and if the door is hot, don't open it find another way out.
- Learn all the fire exits in your house. Assign a safe place outside for everyone to meet in case of a fire emergency.

HOME ALONE

- Never tell anyone that you are home alone.
- If someone calls and ask for your mom and dad, tell them "They cannot come to the phone right now, can you please call back later?"
- Do not answer the door, unless it is someone that you know your parents have okay'd them to come over.
