St. Louis County is the second largest county in the United States, spanning over 6,000 square miles of picturesque wilderness and over 500 lakes. Dakota and Chippewa Indians occupied St. Louis County area until French fur traders and missionaries arrived. Daniel Duluth, a soldier and explorer from France, is believed to have established one of the first trading posts on the shores of Lake Superior in the 1600s. Once known as part of Superior County, St. Louis County was established in 1855 and is named after the St. Louis River. By 1900 St. Louis County had a population of 82,932. With the discovery of iron ore, St. Louis County forms part of the Iron Range where taconite mining continues today and is home to the fastest and largest lift bridge in the world, allowing ships to pass through the canals of Lake Superior. Visitors can also enjoy many recreational activities as the Superior National Forest, Voyageurs National Park and the Boundary Waters Canoe Area Wilderness are located here. Today St. Louis County is home to approximately 196,864 residents.

**Populations are approximate.*

CHISHOLM

Originally called “Meebeega” meaning “Rough Earth” by the Chippewa Indians, Chisholm was first explored by E.J. Longyear in 1892. Located in the heart of the Iron Range, Chisholm was platted and incorporated as a village in 1901. Due to the high amount of mining work and close proximity to the railroad, Chisholm grew dramatically. There were over 6,000 residents and over 500 buildings by 1908 until a forest fire destroyed the town. Building codes were improved and within a year, over 70 fireproof buildings had been constructed. In 1934 Chisholm became a city and residents continue to celebrate Chisholm Fire Days in celebration of their perseverance. Today Chisholm is home to approximately 4,594 residents.

DULUTH (COUNTY SEAT)

Duluth was originally occupied by Dakota and Chippewa Indians. French explorers arrived in the 1600s and began trapping and trading fur. Daniel Duluth was sent by the French to settle disputes between the tribes and to progress the fur trading industry, thus the area came to be known as Duluth. Upon settlement, Duluth was the only port in the United States with access to the Atlantic and Pacific Oceans where lumber, wheat and iron ore were shipped. The arrival of the railroad furthered its progress. Duluth was soon the fastest growing and largest city in the United States until a stock market crash in 1873. With the abundance of natural resources, Duluth recovered and is the largest city on the North Shore. Today Duluth is home to approximately 84,284 residents.

ELY

Occupied by the Chippewa Indians, Ely was explored by French fur traders. As prospectors arrived in search of gold, rich iron ore deposits were discovered here in 1883. On the shores of Shagawa Lake a mining village was established called "Florence." As more iron deposits were discovered west, the settlement moved and was renamed "Ely" after Samuel Ely, a miner from Michigan. The shipment of iron ore began in 1888 and sawmills and logging industries were established to meet the growing needs of the mines. As the industries in Ely began to boom, the railroad was extended to simplify the transport of goods. As of 1916 Ely was a widely known tourist attraction. Today Ely is home to approximately 3,473 residents.

EVELETH

Eveleth was platted in 1892 and is named after Erwin Eveleth. Eveleth was a timber cruiser sent from Michigan to purchase the local pinelands. As iron ore was discovered in 1895, the town relocated closer to the mineral deposits and in 1902 Eveleth was incorporated as a city. Mining continues to be the leading industry. Eveleth is known as the hockey capital of Minnesota, home to the world's largest hockey stick. Today Eveleth is home to approximately 3,582 residents.

HIBBING

Hibbing was established in 1893 by Frank Hibbing, a German miner who discovered iron ore in the area and the area was once known as the "Iron Capitol of the World." When a large deposit of ore was found two miles south in the 1920s, Hibbing moved to its present location. Over 20 businesses and 180 houses were moved by logs and steel wheels at the cost of \$16 million, taking several years to complete. The remains of buildings at the old location can still be found. Hibbing is widely known for its famous former residents, most notably, Bob Dylan. Today Hibbing is home to approximately 16,209 residents.

HERMANTOWN

Hermantown is a suburb of Duluth that saw its first settlers in 1872. The area that would become known as Hermantown consisted of a few homesteads until shortly before World War II. A new wave of homesteaders came to the area because of a federal government project to help families during the great depression. It was one of two such projects in Minnesota designed to establish single family "subsistence homesteads." The Jackson Project was completed in 1937 and consisted of 84 homesteads. The city of Hermantown was incorporated in 1975 and has a population today of roughly 9,361.

VIRGINIA

Virginia was originally called "Qeechaquepagem" or "lake of the north birds" by the Cherokee tribe. In 1890 the first settlers arrived hoping to find gold. Instead, large iron deposits were discovered and the town was incorporated in 1892. After twice being destroyed by fire, all buildings in Virginia were required to be brick, concrete or stone in 1900. Virginia Rainy Lake Lumber was built in 1909 and was the largest white pine mill worldwide. Today Virginia is home to approximately 8,480 residents.

So, You have decided to get a pet... NOW WHAT??

Commitment and Time: Owning a pet is a long-term commitment. Before bringing a pet home, consider your lifestyle and ensure you have enough time to spend with your pet. Dogs, cats, and many other animals require attention, exercise, and mental stimulation.

Choose the Right Pet for Your Lifestyle: Different pets have varying needs, temperaments, and activity levels. Research and select a pet that fits well with your lifestyle, living situation, and family dynamics. Whether you choose a dog, cat, bird, fish, or any other animal, make sure you can provide for its specific needs.

Proper Nutrition: Feed your pet a balanced and nutritious diet suitable for their species and age. Consult with a veterinarian to determine the best food options for your pet's health and well-being.

Regular Exercise: Most pets need regular physical activity to stay healthy and happy. Engage in playtime and exercise with your pet daily, as it helps prevent obesity and provides mental stimulation.

Routine Veterinary Care: Schedule regular check-ups with a veterinarian to monitor your pet's health, get necessary vaccinations, and address any concerns. Early detection of health issues can often lead to better outcomes.

Spaying/Neutering: Consider spaying or neutering your pet if you don't plan on breeding. This helps control the pet population and can have health benefits for your pet.

Training and Socialization: Properly train your pet to follow basic commands and have good manners. Socialize them with other animals and people from a young age to prevent behavioral issues later on.

Provide a Safe Environment: Ensure that your home and yard are safe for your pet. Remove hazards, keep toxic substances out of reach, and provide appropriate shelter from extreme weather conditions.

Grooming: Regular grooming is essential for most pets. Brush their fur, trim nails, and clean their ears as needed to keep them comfortable and healthy.

Identification and Microchipping: Keep identification tags with your current contact information on your pet's collar. Consider microchipping your pet as an extra measure to ensure they can be identified if lost.

Love and Attention: Pets thrive on love and attention from their owners. Spend quality time with your pet, provide affection, and build a strong bond.

Respect and Understanding: Learn to understand your pet's body language and behavior. Respect their boundaries and feelings, and avoid forcing them into uncomfortable situations.

Patience and Forgiveness: Pets, especially young ones, can be mischievous or have accidents. Be patient with them during the training process and forgive any mistakes they make along the way.

Emergency Preparedness: Have a plan in place for emergencies, including natural disasters. Know how to evacuate with your pet safely if needed.

If you have just rescued / adopted a new fur baby, please it is important to remember the 3-3-3 RULE:

3 Days:

In the first 3 days being in its new home, they will be feeling overwhelmed, scared & unsure of what is going on. They may also be uncomfortable being "themselves", and may not want to eat or drink. They may want to "shut down" or hide under a bed or in a crate, and they will test boundaries.

3 Weeks:

At this point, they may be a lot more comfortable & settling in. Learning a new routine can be overwhelming, so please be patient. By now they may have figured out the new environment & accepted that this may be their FURever home. Their personality traits will start to show, as well as any behavior issue that may be present.

3 Months:

For most fur babies, 3 months is enough time to finally be comfortable and begin to build trust and a true bond. A sense of security may be present & a set routine will help this process.

Please know that this is not the rule with every rescued or adopted pet, as some may need 6 months to a year to adjust & adapt, depending on MANY factors. Age of animal, what type of an environment did they come from?

Remember that ethical hunting practices, respect for wildlife, and safety should always be paramount while participating in any hunting activity. Additionally, always make sure to follow local hunting guidelines and regulations to protect the environment and wildlife populations. **HAPPY HUNTING!**

- ◆ **Wear Blaze Orange!** Being mistaken for a deer, can be deadly
- ◆ **Scout the Area:** Before the hunting season begins, spend time scouting the hunting area. Look for deer signs such as tracks, droppings, rubs, and scrapes
- ◆ **Practice Stealth and Scent Control:** Deer have an excellent sense of smell and can be easily spooked by human scent
- ◆ **Know the Local Regulations and Laws:** Before you head out on your hunting trip, familiarize yourself with the local hunting regulations and laws.

FIREWOOD

Burn it where you get it!

Invasive pests like the Emerald Ash Borer and Gypsy Moth have devastated millions of trees in the United States. Where these pests come from, the population stays in control because they have natural predators. The United States does not have these natural predators so the populations have the chance to grow to extreme numbers.

Emerald Ash Borer

Gypsy Moth Caterpillar

Preventing the Spread

- Buy local firewood.
- Burn all firewood completely at each destination.
- Move only Certified firewood out of a quarantine county or across state boundaries.
- Use firewood from nearby sources to heat your home or cabin.
- Tell your friends and family about the importance of not moving firewood.
- Don't move hardwood firewood out of a quarantine county, unless it is state or USDA certified.
- Don't move opened firewood bundles.
- Don't move firewood long distances to or from your lake home or cabin.

Invasive Pests are a Problem!

30 Center St. • Soudan, MN

NEW: Charming 4 bedroom cottage with living room & kitchenette.

(2 night minimum)

Be Aware of your Surroundings

- Always wear a properly fitting bike helmet as most serious injuries are to the head.
- Be sure your handlebars, seat and wheels fit snugly.
- Keep your bike in good shape by checking and oiling your chain, making sure your brakes work properly and maintaining your tire pressure.
- Always ride with both hands on the handlebars except when doing turn signals.
- When leaving a driveway, curb or alleyway always stop and check for traffic in both directions.
- Cross only at intersections.
- Use the crosswalk to walk your bike across busy intersections and follow the traffic signals.
- Never ride against traffic. Travel in the same direction as the cars.
- Whenever you can, use bike routes and avoid busy streets.
- Don't ride near parked cars as doors can open and cause accidents.
- Obey all traffic signs and traffic lights.
- When biking with friends, ride in a single file.
- Always pass other bikers or pedestrians on the left and say "On your left!" to make your presence known.
- Always use bicycle hand signals to alert traffic of your changing direction.

Drink lots of Water!

Know Your ATV

Read the owner's manual

and know your vehicle thoroughly. • Check your vehicle before you ride. • Wear protective equipment and clothing. • Don't lend your vehicle to unskilled riders. • Supervise young or inexperienced riders. • Never carry a passenger on vehicles meant for one rider. • Do not operate under the influence of drugs or alcohol. • Drive at speeds that are appropriate to trail conditions. • Stay to the right on trails. • Stay away from thin ice, open water and wetlands • Know the weather forecast. • Make sure headlights and taillights work properly. • Maintain safe distances between other riders. • Reduce your speed when riding at night. • Yield to other motor vehicles and trail users. • Young or beginning riders are encouraged to take a safety training course.

- Do not consume alcohol or take drugs prior to or during your snowmobile trip. Doing so increases your chances of injury or death.
- Slow down and don't cut to the inside of the trail corners. It's dangerous and illegal.
- If you snowmobile at night, don't override your lights.
- Always use the buddy system. Never ride off alone.
- Drowning is one of the causes of many snowmobile fatalities. Whenever possible, avoid the ice.
- Wear sensible, protective clothing designed for operating a snowmobile.
- Use a full size helmet, goggles, or visor to prevent injuries from twigs, stones, ice chips and other debris.
- Avoid wearing long scarves. They may get caught in moving parts of the snowmobile.
- Know the terrain you are going to ride. If unfamiliar to you, ask someone who has traveled over it before.
- Know the weather forecast, especially the ice and snow conditions.
- Be sure your snowmobile is in top-notch mechanical condition throughout the months of use.
- Familiarize yourself with the snowmobile you are driving. Thoroughly read the manual that accompanies the snowmobile.
- Do not pursue domestic or wild animals. That is not the conduct of a sportsman. Report such violations to the nearest law enforcement officer.

Snowmobile Hand Signals

Communication is an essential part of safe riding. Hand signals are a practical way to communicate between other riders and traffic. Be sure to give easy to see and clear hand signals when snowmobiling. Hand signals should never be subtle, but always deliberate.

PRIVATE PROPERTY
NO TRESPASSING

Please respect private property and no trespassing signs. Stay on trails. Exercise extreme caution on all lakes and streams. Obey all state and local laws and ordinances. Do not operate snowmobiles/ATVs on county roads or state highways.

Tilapia Baked in Garlic Butter

Simple meal with a Gourmet Feel

INSTRUCTIONS

- 1 Preheat your oven to 375°F (190°C).
- 2 Pat the tilapia fillets dry with paper towels and place them in a baking dish.
- 3 In a small bowl, mix together the minced garlic and melted butter.
- 4 Pour the garlic butter mixture over the tilapia fillets, making sure they are well coated.
- 5 Season the fillets with salt and pepper to taste.
- 6 Bake the tilapia in the preheated oven for 12-15 minutes or until the fish is cooked through and flakes easily with a fork.
- 7 Sprinkle chopped parsley over the top of the cooked tilapia, if desired.
- 8 Serve the tilapia fillets hot, with your favorite side dishes.

INGREDIENTS

- 4 tilapia fillets
- 4 cloves garlic, minced
- 4 tablespoons butter, melted
- Salt and pepper, to taste
- Fresh parsley, chopped (optional)

*Enjoy your delicious
and healthy tilapia
baked in garlic butter!*

PREP: 35 MIN • TOTAL: 50 MIN

CROSS COUNTRY SKIING

Cross country skiing is a great way to stay in shape throughout winter. It provides an excellent aerobic exercise while also strengthening your legs, arms and core muscles. During a classic cross country skiing adventure you can burn around 600 calories per hour while traveling at around 3mph. On top of the health benefits, it's fun to do and lets you get outside to enjoy the snowy months.

There are two main types of cross country skiing, classic and skate. Classic is more traditional and involves pushing off each ski parallel to one another. Skate skiing requires pushing off each ski in a V pattern like ice-skating.

If you are just learning, you may want to start off on some of the easier trails in your area. These trails tend to be maintained better and have smaller hills.

Before investing money into equipment, check your area for trails with a rental shop. That way you can give it a try to see if it is a winter activity you enjoy.
