## *Washburn County History* (Shell Lake, County Seat)

Once home to Sioux and Chippewa Indians, Washburn County was settled in the 1860s. Loggers began to arrive to harvest white and Norway pines, and waterway ports utilized to transport lumber became communities. Shell Lake was selected as the County Seat and as industry diversified, the area continued to grow and develop. Between 1900 and 1910, the population of Washburn County grew from 5,521 to 8,196. The many lakes located within Washburn County made the area a popular tourist destination and now is recognized as the Walleye Capital of Wisconsin and home to the largest Muskie hatchery. Today Washburn County is home to approximately 16,712 residents.

## **BIRCHWOOD**

Attracted to the ample timber and pristine lakes, Birchwood was first settled in the 1880s. Early industry included logging and farming. As the railroad arrived, Birchwood continued to grow and a variety of businesses were thriving by 1900. Birchwood became a popular tourist destination due to its proximity to a variety of lakes and is now recognized as the Bluegill Capital of Wisconsin. Today Birchwood is home to approximately 548 residents.

## **SARONA**

Once part of Bashaw, Sarona was established in 1904 and named in honor of the biblical place Sharon, and Sauer after an early settler. As the railroad arrived, Sarona began to thrive. The area has now become a popular area for outdoor enthusiasts and is home to the Hunt Hill Nature Center and Audubon Sanctuary. Today Sarona is home to approximately 412 residents.

# Washburn County Communities

## SHELL LAKE (COUNTY SEAT)

Shell Lake began as a logging community in the 1880s. As the railroad arrived, Shell Lake began to develop and businesses began to thrive. Selected as the County Seat, Shell Lake continued to grow and industry began to diversify. It is home to the largest landlocked seepage lake in Wisconsin and draws thousands of visitors annually. Today Shell Lake is home to approximately 1,393 residents.

## SPOONER

Spooner began as a railway community named Chandler in 1879. Chandler was renamed in honor of John Coit Spooner, a local railroad advocate, legislator, attorney and politician in 1883. Settlers began to arrive by train and steamboat and Spooner continued to grow. Businesses were established and the area came to be recognized as a tourist destination. Today Spooner is home to approximately 2,655 residents.

## TREGO

Trego began as a lumbering community and was once known as the Superior Junction. Trego was founded in 1904 as the town of Mills and in 1906 the name was changed to Trego. The community has since become a haven for recreational activities due to its proximity to lakes and forest. Today Trego is home to approximately 914 residents.

## Barron County History (Barron, County Seat)

Barron County was once home to Sioux and Chippewa Indians. First established in 1859 as Dallas County, Barron County was renamed in 1869. The area quickly grew as a logging and lumbering center. Communities were established near railways, waterways and lumber camps, and the city of Barron was selected as the County Seat. Settlers arrived to take part in the lumber industry and others established farms on land cleared by loggers. By 1920 the population of Barron had reached 34,281 and as industry began to diversify, the area continued to grow. Today Barron County is home to approximately 45,590 residents.

*\*Populations are approximate.*

## **BARRON (COUNTY SEAT)**

In 1860 John Quaderer established a logging camp in present day Barron. By 1880, a mill, hotel, blacksmith shop, general store and post office were established and the community began to attract new settlers. As the railroad arrived, Barron continued to grow and was selected as the County Seat. It was named in honor of Henry D. Barron, a judge and legislator and is home to the Jenny-O-Turkey Store, the largest turkey processor in the nation. Today Barron is home to approximately 3,122 residents.

# Barron County Communities

## **CAMERON**

Established in the 1880s, Cameron began as a logging and trading center. It was named in honor of Senator Angus Cameron of Wisconsin, an active member of civic affairs. As the railroad arrived, Cameron continued to develop and businesses, general stores and mills were thriving. Today Cameron is home to approximately 1,707 residents.

## **CHETEK**

Once a trading post, Chetek was first settled in 1866. A school was established in 1871 and the community was platted in 1875. As the railroad arrived in 1882, Chetek began to develop and was then incorporated as a city in 1891. Businesses and mills were thriving and by 1903 telephone service was established. Today Chetek is home to approximately 2,140 residents.

## **CUMBERLAND**

Cumberland was founded in 1880 as a lumber and logging center. Large mills were built and the area boasted more saw mills than any other area in the country. By 1890 its population reached 1,486 and the area continued to grow. Today Cumberland is home to approximately 2,240 residents.

## **RICE LAKE**

In 1874 Knapp, Stout & Co. platted the community known as Rice Lake. It was named after the abundant rice beds that filled the local lowlands and quickly became lumbering camp. Settlers arrived to take part in the logging business and by 1885 the population of Rice Lake tripled. In 1890 Rice Lake was home to a variety of mills, a newspaper, brewery, post office, furniture store and specialty shops. As the railroad arrived, Rice Lake continued to develop and the community became a retail trading center. Today Rice Lake is home to approximately 8,257 residents.

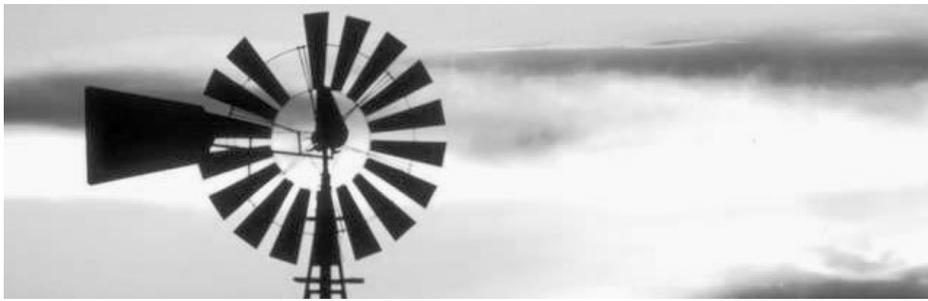

## **TURTLE LAKE**

First settled in 1875, Turtle Lake was originally known as Skowhagen. The area began to grow as logging and lumbering camps were established. The community was renamed Turtle Lake after government surveyors noticed an array of turtle eggs along the local shorelines. In 1879 a post office was built with Stephen Richardson serving as its first postmaster. The community was platted in 1898 and Turtle Lake was officially incorporated. Today Turtle Lake is home to approximately 1,029 residents.

## Tips on Recycling & Living Greener

 **Recycle as much as you can.** Even simple everyday things, such as plastic bottles and aluminum cans, can make a huge difference.

 **Switch your incandescent light bulbs to compact fluorescent ones.** Save money and energy.

 **Bring your own reusable shopping bags with you to the supermarket or the mall.**

 **Donate your unwanted clothing to a local charity.** Eyeglasses, household items, electronics and even vehicles can be accepted.

 **Recycle your used ink and toner cartridges.** Most office supply stores accept used cartridges.

 **Recycle your used batteries.** This prevents poisonous mercury from seeping into our water supplies and soil. Switch to rechargeable ones.

 **Switch to unbleached toilet paper, paper towels and coffee filters.** Avoiding bleached products can help preserve our water supply and soil.

 **Unplug any unused appliances.** Your cell-phone charger uses electricity, even when your phone isn't charging - especially if you are not going to be home.

 **Bring your own lunch.** You'll avoid using non-recyclable styrofoam to-go containers and unnecessary throw-away packaging.

 **Start a compost bin in your yard.** There are even ones that you can store under your kitchen sink.

 **Be crafty.** Let old items be an inspiration for a craft project and re-purpose old items. Punch holes in tin cans to make candle luminaries or use empty yogurt containers to organize nuts and bolts.

 **Have a green-cleaning product party.** Invite your friends over to make enough vinegar-based homemade cleaners to share.

 **Run your washer/dryer/dishwasher after 5pm.** This is when less electricity is being used, especially in larger cities. In air-conditioned summer months this can help prevent blackouts.

# Hunting Safety

**All hunters should consider taking an advanced hunter education class to learn the latest hunting techniques along with tips on coming home alive.**

**Here are five suggestions for a safe and successful hunting experience:**

1. Get a detailed map of the area you are hunting, review it before you leave, and carry it with you in the field.
2. Carry a compass and know how to use it. Decide ahead of time the direction to head for if you get lost or disoriented.
3. Weather can change quickly, so hunters should carry a simple survival kit and be prepared for an unexpected overnight stay in the field. The survival kit should contain a rope, a knife, water, waterproof matches, an emergency shelter, and first aid supplies.
4. If you are on the water, make sure to wear a personal flotation device (life preserver).
5. Know your hunting partners' physical and emotional limitations, as well as your own, and don't push your partners or yourself beyond those limits.

# Boating Safety

## Operating Watercraft

**Follow these guidelines to help prevent and prepare for capsizing, swamping, or someone falling overboard.**

Make sure that you and your passengers are wearing life jackets while the boat is moving.

Attach the ignition safety lanyard to your wrist, clothes, or life jacket.

Don't allow anyone to sit on the gunwale, bow, seat backs, motor cover, or areas not designed for seating. Also, don't let anyone sit on pedestal seats when craft is not in idle.

Don't overload your boat. Balance the load of passengers and gear stored on-board.

Keep your center of gravity low by not allowing people to stand up or move around while craft is in motion.

In small boats, don't allow anyone to lean beyond the gunwale.

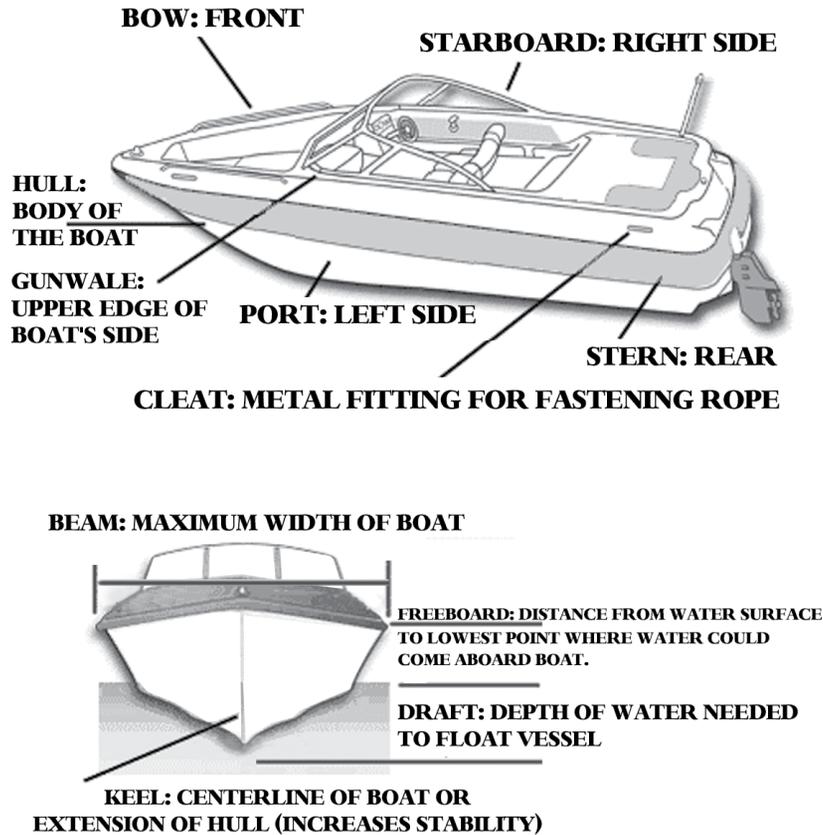

Turn boat at slow rates of speed.

Secure the anchor line to the bow, never to the stern.

Don't risk operating water craft in rough conditions or bad weather.

# Boating Safety

## Know Your Craft

## Who May Operate a Motorboat (Other Than a Personal Watercraft)

### For engines 25 horsepower or less:

Those under age 12 may operate without restrictions.

### For engines over 25 horsepower through 75 horsepower:

Those under age 12 must have someone 21 years of age or older on board within reach of the controls.

### For engines over 75 horsepower:

No children under age 12 may operate, even with an adult on board.

### Other restrictions apply to boat operators 12 to 17 years old:

Operators from 12 to 17 years of age may operate engines of 25 horsepower or lower with no restrictions.

### For engines over 25 horsepower:

Operators 12 to 17 years of age must have:

A watercraft operator's permit, or someone age 21 years or older on board within reach of the controls.

## Tips on Recycling & Living Greener

**Recycle as much as you can.** Even simple everyday things, such as plastic bottles and aluminum cans, can make a huge difference.

**Switch your incandescent light bulbs to compact fluorescent ones.** Save money and energy.

**Bring your own reusable shopping bags with you to the supermarket or the mall.**

**Donate your unwanted clothing to a local charity.** Eyeglasses, household items, electronics and even vehicles can be accepted.

**Recycle your used ink and toner cartridges.** Most office supply stores accept used cartridges.

**Recycle your used batteries.** This prevents poisonous mercury from seeping into our water supplies and soil. Switch to rechargeable ones.

**Switch to unbleached toilet paper, paper towels and coffee filters.** Avoiding bleached products can help preserve our water supply and soil.

**Unplug any unused appliances.** Your cell-phone charger uses electricity, even when your phone isn't charging - especially if you are not

going to be home.

**Bring your own lunch.** You'll avoid using non-recyclable styrofoam to-go containers and unnecessary throw-away packaging.

**Start a compost bin in your yard.**

There are even ones that you can store under your kitchen sink.

**Be crafty.** Let old items be an inspiration for a

craft project and re-purpose old items.

Punch holes in tin cans to make candle luminaries or use empty yogurt containers to

organize nuts and bolts.

**Have a green-cleaning product party.** Invite your friends over to make enough

vinegar-based homemade cleaners to share.

**Run your washer/dryer/dishwasher after**

**5pm.** This is when less electricity is being used, especially in larger cities.

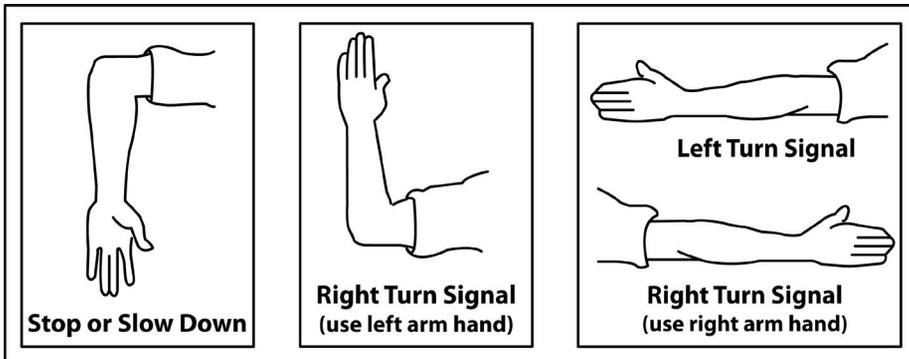

In air-conditioned summer months this can help prevent blackouts.

# Bicycle Safety

- Always wear a properly fitting bike helmet as most serious injuries are to the head.
- Be sure your handlebars, seat and wheels fit snugly.
- Keep your bike in good shape by checking and oiling your chain, making sure your brakes work properly and maintaining your tire pressure.
- Always ride with both hands on the handlebars except when doing turn signals.
- When leaving a driveway, curb or alleyway always stop and check for traffic in both directions.
- Cross only at intersections.
- Use the crosswalk to walk your bike across busy intersections and follow the traffic signals.
- Never ride against traffic. Travel in the same direction as the cars.
- Whenever you can, use bike routes and avoid busy streets.
- Don't ride near parked cars as doors can open and cause accidents.
- Obey all traffic signs and traffic lights.
- When biking with friends, ride in a single file.
- Always pass other bikers or pedestrians on the left and say "On your left!" to make your presence known.
- Always use bicycle hand signals to alert traffic of your changing direction.

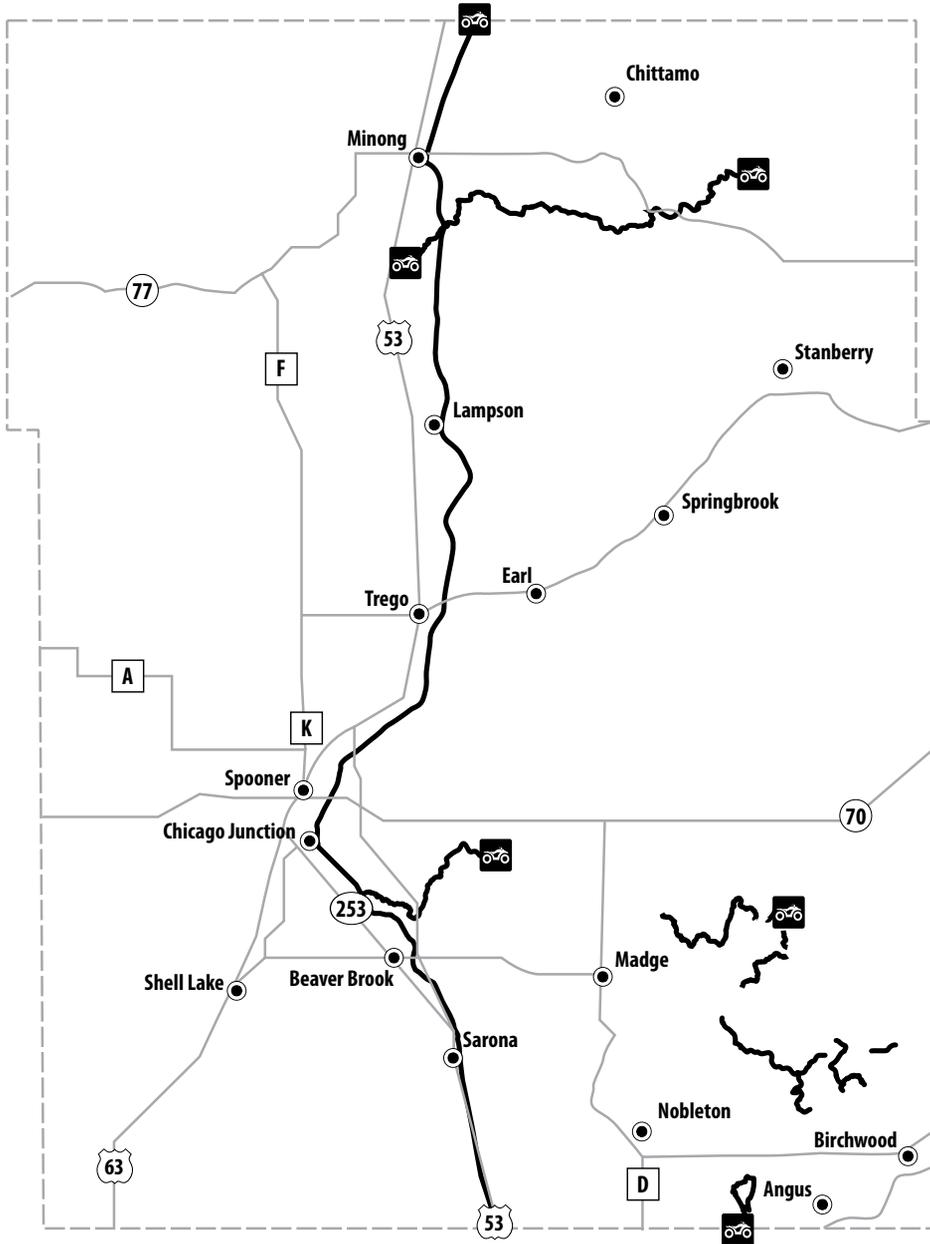

# ATV Safety

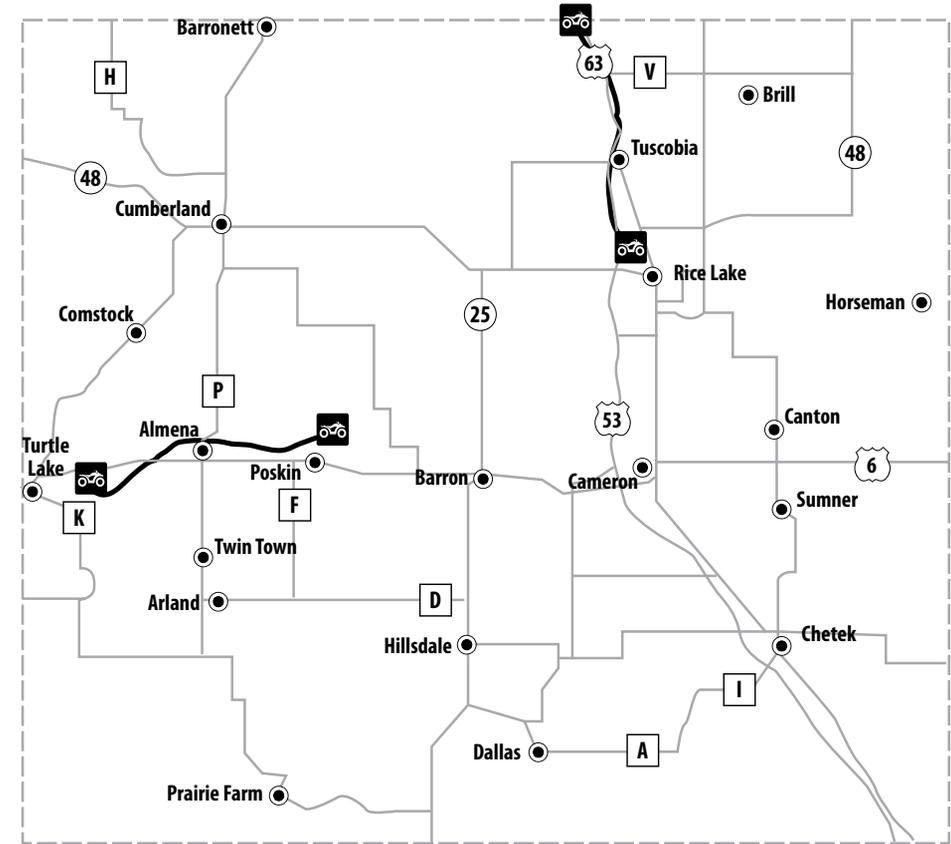

- Read the owner's manual and know your vehicle thoroughly.
- Check your vehicle before you ride.
- Wear protective equipment and clothing.
- Don't lend your vehicle to unskilled riders.
- Supervise young or inexperienced riders.
- Never carry a passenger on vehicles meant for one rider.
- Do not operate under the influence of drugs or alcohol.
- Drive at speeds that are appropriate to trail conditions.
- Stay to the right on trails.
- Stay away from thin ice, open water and wetlands
- Know the weather forecast.
- Make sure headlights and taillights work properly.
- Maintain safe distances between other riders.
- Reduce your speed when riding at night.
- Yield to other motor vehicles and trail users.
- Young or beginning riders are encouraged to take a safety training course.

# Washburn County ATV Trails

# Barron County ATV Trails

**Advertisers Appreciate It!  
Tell Them You Saw Them In The Guide!**

**LincolnMarketing**  
www.lincolnmarketing.us  
SINCE 1984

# Snowmobile Safety

- Do not consume alcohol or take drugs prior to or during your snowmobile trip. Doing so increases your chances of injury or death.
- Slow down and don't cut to the inside of the trail corners. It's dangerous and illegal.
- If you snowmobile at night, don't override your lights.
- Always use the buddy system. Never ride off alone.
- Drowning is one of the causes of many snowmobile fatalities. Whenever possible, avoid the ice.
- Wear sensible, protective clothing designed for operating a snowmobile.
- Use a full size helmet, goggles, or visor to prevent injuries from twigs, stones, ice chips and other debris.
- Avoid wearing long scarves. They may get caught in moving parts of the snowmobile.
- Know the terrain you are going to ride. If unfamiliar to you, ask someone who has traveled over it before.
- Know the weather forecast, especially the ice and snow conditions.
- Be sure your snowmobile is in top-notch mechanical condition throughout the months of use.
- Familiarize yourself with the snowmobile you are driving. Thoroughly read the manual that accompanies the snowmobile.
- Do not pursue domestic or wild animals. That is not the conduct of a sportsman. Report such violations to the nearest law enforcement officer.

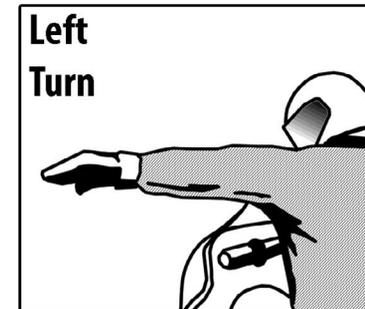

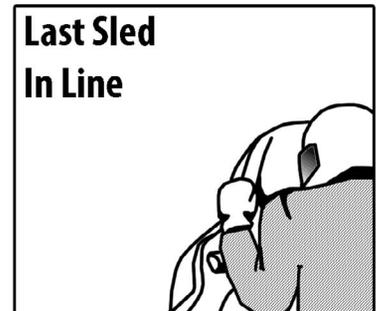

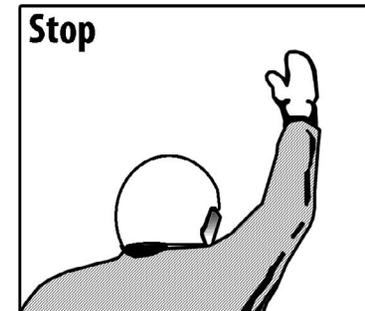

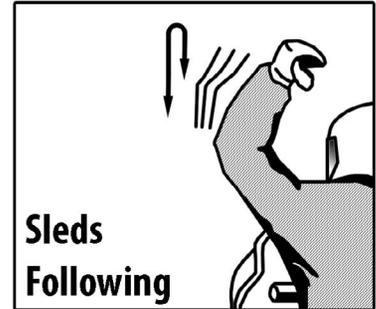

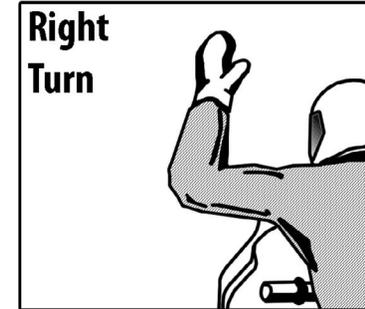

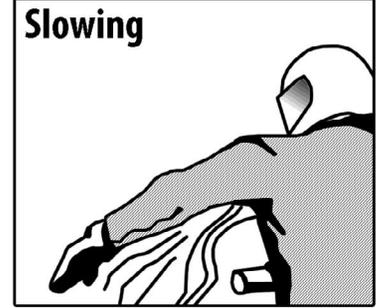

## Common Trail Signs

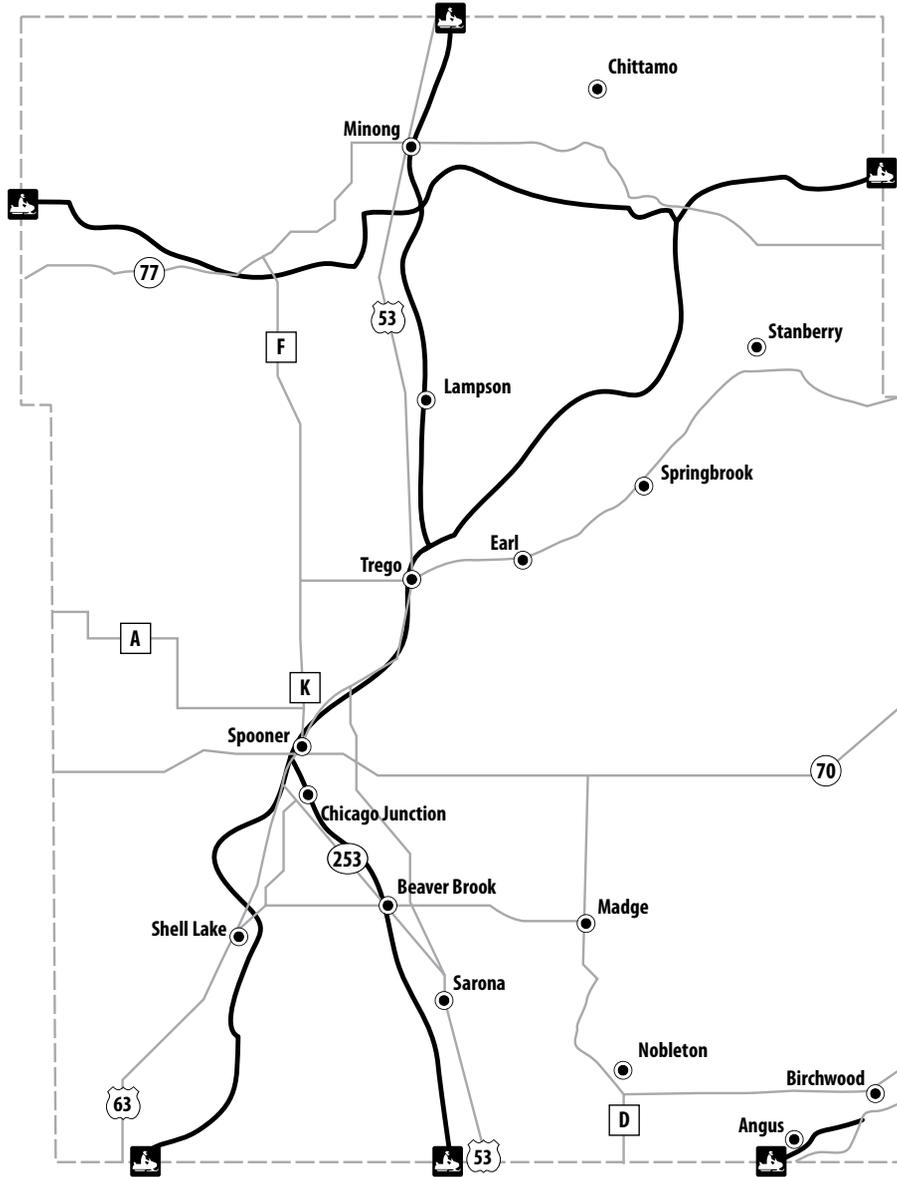

# Snowmobile Safety

Communication is an essential part of safe riding. Hand signals are a practical way to communicate between other riders and traffic.

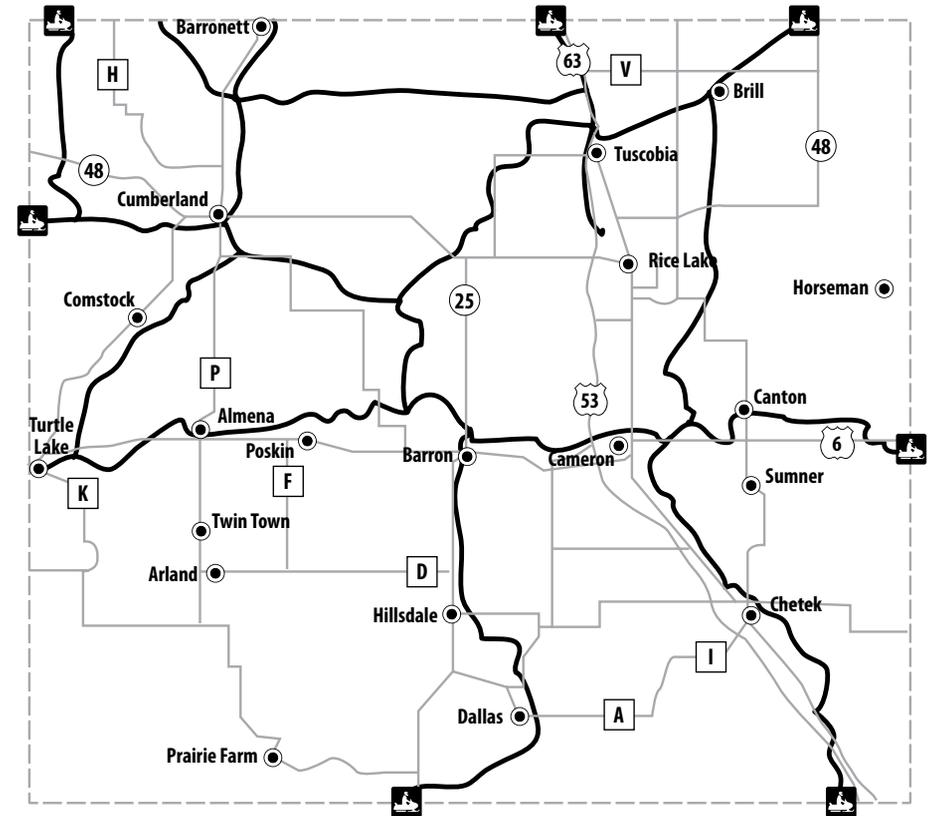

Be sure to give easy to see and clear hand signals when snowmobiling. Hand signals should never be subtle, but always deliberate.

# Washburn County Snowmobile Trails

# Barron County Snowmobile Trails

# Home Safety

- Keep the outside of your home well-lit. Motion sensors and timers help deter burglars.
- Dead-bolts and peep-holes should be placed on all outside doors.
- Windows and sliding glass doors should have locks and be in good working order.
- Keep your garage door closed.
- Use an engraver to mark computers, cameras, stereos, TV's, tools, yard equipment, etc.
- Never leave valuables, expensive jewelry, or large amounts of cash at home. If you must, keep a list of your valuables with serial numbers to assist in insurance claims.
- Keep your car locked at all times and store all valuables out of sight.
- Guns should always be stored unloaded and with a gunlock.
- Become part of a neighborhood watch or program that is similar.
- Be suspicious of unusual people or vehicles in your neighborhood. Document the date, time, description and license plate number to give to law enforcement if needed.
- When on vacation, do not advertise your absence. Stop mail and newspaper delivery. Have a trusted friend or neighbor to give the impression you are home by stopping by to take out trash, shovel snow, mow the lawn, etc.

# Carbon Monoxide Safety

## PREVENTION

- Install carbon monoxide detectors near every bedroom, gas appliance and in your RV, camper or motor home and test them monthly.
- Have flues, chimneys and all fuel-burning appliances inspected by a professional annually.
- Make sure fireplaces, wood stoves, dryers, furnaces and water heaters are properly vented to the outside.
- Only burn clean and untreated wood.
- Never idle your car or gas powered vehicle in the garage, with or without the garage door open.
- Toxic fumes build up quickly and can easily contaminate your home.
- Never use gas-powered engines like weed trimmers, snow blowers, chain saws, lawnmowers or portable generators in enclosed areas.
- Never use a charcoal grill indoors or in any closed area.
- Never use a gas oven to heat your home.
- Never sleep in a room or area heated with a gas or kerosene space heater that does not have proper ventilation.

## SYMPTOMS

- Headaches, severe fatigue, vomiting, nausea, muscle and joint pain, dizziness, tingling, vertigo
- Attention and multi-tasking problems, short-term memory problems, word-finding problems
- Irritability, temper, loss of interest, sleep disturbance, anxiety, lack of motivation
- Eating and swallowing difficulties, vision problems, lack of muscular coordination, speaking difficulty, ringing in the ears
- Seizures, tremors, balancing problems, shortness of breath

***Carbon monoxide poisoning is easily confused with flu-like symptoms. Serious long-term health risks or death can result if warning signs are ignored. Carbon monoxide can affect you for days, weeks, months or years. High levels of carbon monoxide can be fatal within minutes.***

## TREATMENT

- Immediately take the victim out to fresh air.
- If the victim cannot be removed, open every window and door.
- All appliances should be turned off.
- Take the victim to an emergency room as quickly as fast as possible, or call 911.

# Emergency Planning

## ESCAPE ROUTES

Everyone in your family should know the best ways to exit the house in case of a disaster. Teach your young children how to open sliding doors, windows and other exits. Designate a meeting place where the family can gather after escaping from the house.

## FLASHLIGHTS

The whole family needs to know where to find flashlights. Periodically check the batteries.

## FULLY CHARGED CELL PHONES

All family members should keep their cell phones charged. Make a habit of charging them, while everyone is asleep. Cell phones can be lifesavers in emergencies.

## LIST OF VALUABLES

Keep this document listing your possessions (and if possible, a video of your home interior) in a fireproof safe, or in a safe deposit box at a bank.

## COMMUNITY EMERGENCY PLANS

Familiarize yourself with community evacuation plans and neighborhood escape routes. Post a copy of them in a highly visible place in your home.

## THUNDERSTORM/TORNADO

- Remove dead branches from trees beforehand to avoid injury or damage.
- After seeing lightning, if you hear thunder in less than 30 seconds, it is recommended that you stay inside for 30 minutes after the thunder has ceased.
- The inside of a car is safer than the outside, as a lightning strike will simply pass through the car as long as you aren't in contact with any metal.
- Unplug all major appliances, as a power surge can cause serious damage.
- Avoid all tall structures and elevated areas as well as large amounts of metal.

## FIRES

- Make sure that every level of your house has a smoke detector, and be sure to test them once a month. Have the family plan an emergency exit route.
- Always keep track of any stoves or high-temperature/high-voltage appliances that are running. Be sure to never leave any cooking unattended.
- Keep lighters and matches away from children.
- If a burn occurs, soak the skin in cool water. If the skin blisters, seek medical assistance.

# ⊕ Emergency First-Aid Tips ⊕

## FIRST AID FOR BURNS & CHOKING

## BURNS

**For minor 1st and 2nd degree burns smaller than 3" in diameter:** Cool the Burn. Run cool water over the burned area for 5 minutes, or until the pain diminishes. Never put ice on a burn!

## Bandage the burn with sterile gauze:

It is important to use loosely wrapped gauze. This will avoid pressure and the bandage protects blisters. NEVER put lotions, vaseline, ointments or butter on burn. Do not break any blisters, which can cause infection.

## Take Aspirin, Ibuprofen, Naproxen or Acetaminophen to relieve pain:

Minor burns usually heal with these basic treatments. Be aware for signs of infection which may include: increased pain, redness, fever, swelling or oozing. If symptoms develop, seek medical help. Avoid tanning the burned area for at least a year. Protect the area with sunscreen outdoors. Avoid giving aspirin to children.

## For 3rd degree burns/all major burns - DIAL 911

**DO NOT run cold water over large severe burns - this can cause shock.**

**DO NOT remove burnt clothing.**

**Check for signs of breathing/coughing/movement.**

**If there are no signs of breathing begin CPR.**

**Elevate burned areas above heart level, if possible.**

**Cover the burn(s) with cool, sterile, moist bandages, towels or cloth.**

## CHOKING

Most people clutch at their throats when choking, an obvious symbol for help. However, if a person isn't giving that signal, be alert for these indications. Inability to talk, difficulty breathing or noisy breathing, inability to cough forcefully, skin/lips/nails turning blue, loss of consciousness.

The Red Cross recommends a "five-and-five" method for first aid: First give five blows between the person's shoulders with the heel of your hand. Second, perform the Heimlich maneuver (abdominal thrusts) five times. Alternate between five back blows and five abdominal thrusts until the blockage is dislodged.

## **FIRST AID FOR CPR & HEART ATTACK**

### **CPR**

CPR is to be administered when a person is not breathing or has no pulse. Be quick to act by remembering the A,B,C's: Airway, Breathing & Circulation.

### **Airway:**

Place the person on a firm surface, on their back. Kneel next to the person's neck and shoulders. Open the person's airway by tilting back the head and lifting the chin.

### **Breathing:**

With the head tilted and chin lifted, pinch the nostrils shut and cover the person's mouth with yours. Give two slow breaths.

### **Circulation:**

Find the hand position on the center of the breastbone. Place the heel of your hand on that position, with your other hand on top of the first hand. Use your upper body weight to push down. Give two compressions per second. Compress the chest at a rate equal to 100/minute. Perform 30 compressions at this rate. Repeat until an ambulance arrives.

### **HEART ATTACK**

Symptoms of a heart attack may include any of the following:

- Uncomfortable pressure, fullness or squeezing pain in the center of the chest.
- Expanded pain in the upper abdomen.
- Shortness of breath.
- Pain or numbness in either arms, shoulders, neck, jaw or teeth.
- Dizziness or fainting.
- Nausea and sweating.

**If you or someone else may be having a heart attack - follow these steps immediately:**

- **DIAL 911**
- **Chew and swallow Aspirin (unless you are allergic/not allowed to)**
- **Take Nitroglycerin (only if prescribed)**
- **Begin CPR if the person is unconscious**

## **FIRST AID FOR INSECT BITES/ANAPHYLAXIS & POISON SAFETY**

### **INSECT BITES/ANAPHYLAXIS**

**Anaphylaxis is a severe allergic reaction from insect bites (latex, food and drug allergies can also cause Anaphylaxis). Typical symptoms include hives, the swelling of lips or eyes, swollen throat, drop in blood pressure, light headedness, confusion, nausea or diarrhea. If someone is having an allergic reaction from an insect bite with these symptoms:**

### **CALL 911.**

**Administer emergency prescription medication.** See if the person is carrying special emergency allergy medicine and give it to them according to the directions.

### **Loosen tight clothing.**

**Lay the person down.** The person should lay down on their back with feet elevated. Turn them on their side if they are vomiting or bleeding from their mouth to prevent them from choking.

**If they are not breathing - administer CPR.** Most insect bite reactions are mild and cause no allergic reaction. If stung by a bee, use a straight edged object, like a credit card, to scrape away the stinger. Don't use tweezers - they can pinch more venom out of the stinger. Apply an ice pack to the area and take an over the counter pain reliever.

### **POISON PREVENTION**

**Teach your children about poison and how it can look like a food or drink. They should always ask an adult before eating or drinking anything. Have them learn the poison control phone number: 1-800-222-1222 and keep it programmed or posted near all your phones. Here are some prevention tips.**

**Lock up your poisons and medications.** Keep them out of the reach of children, lock them up if possible. Make sure your children understand that medicine is not candy.

**Follow directions carefully.** Read your labels. Be sure to use and store all poisons and medications properly according to recommendations.

**Keep your pets safe from household chemicals, too.** Don't allow pets near areas that have just been cleaned with chemicals, such as freshly mopped floors or bleached bathtubs and sinks. Clean up any antifreeze/coolant spills. Pets like the flavor but they can die if they ingest it. Store poisonous foods or plants in areas that your pets cannot access. Call your local emergency veterinary hospital if you believe your pet has been poisoned.

# Safety Tips for Parents & For Kids

## PARENTS:

- Teach your kids that an emergency is when you need help from a doctor, a police officer or a firefighter.
- Designate a safe place by your house that a child can go to if they need help right away.
- Have your kids memorize your address and phone numbers. They should also know your full name and where you work.

## KIDS:

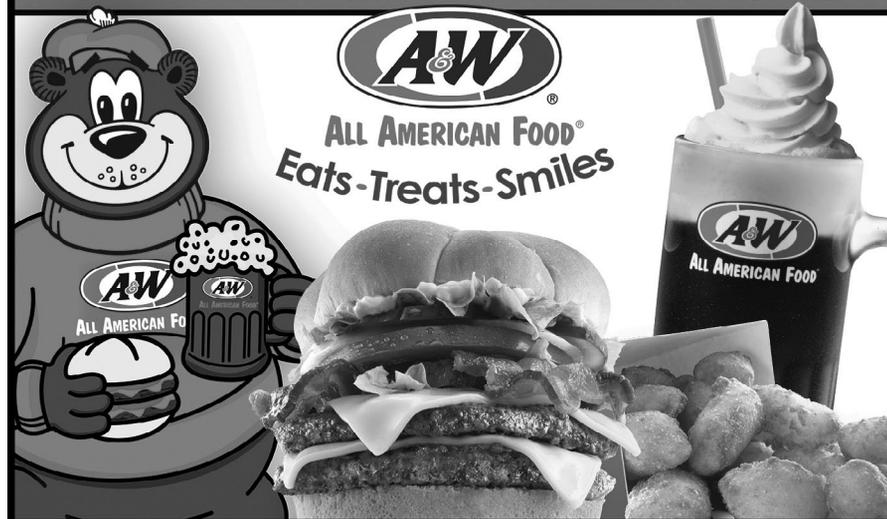

### FIRE SAFETY

- If you or someone else is on fire - remember to STOP, DROP and ROLL. Wrap a blanket on the person to help put out the fire.
- If there is a fire, leave the house as fast as you can! Crawl on the floor to avoid smoke and if the door is hot, don't open it - find another way out.
- Learn all the fire exits in your house. Assign a safe place outside for everyone to meet in case of a fire emergency.

### HOME ALONE

- Never tell anyone that you are home alone.
- If someone calls and ask for your mom and dad, tell them "They cannot come to the phone right now, can you please call back later?"
- Do not answer the door, unless it is someone that you know your parents have okay'd them to come over.
